Denmark, Nov 17<sup>th</sup> 2016

Attn: Biology Centre CAS, Institute of Entomology, Czech Republic

### **Sole Source Justification**

We hereby confirm that Loligo® Systems (Tjele, Denmark) is the only company world-wide to conceptualize and manufacture glass microtiter plates equipped with optical oxygen sensors for aquatic respirometry (*i.e.* devices for measuring oxygen consumption rates in aquatic organisms like invertebrates and fish).

These measurement systems have been developed through more than 20 years of research and in collaboration with leading scientists. Clients from universities and government labs in more than 60 countries currently use Loligo® products for a number of research applications. So far this resulted in more than 350 peer-reviewed scientific papers in international journals referring to the use of Loligo® equipment.

Loligo® Systems have no authorized distributors. Hence we deal directly with customers from all territories and only authorized staff from Loligo® Systems in Denmark can carry out any technical support, service or repairs.
