Proposal for spare actuators for L3 laser mounts

1 References

Customer : ELI Beamlines

Project : spare actuators for mounts - L3 laser

ISP SYSTEM project number: 18A0974

Proposal ref: ISP18A0974PSI0036-C dated 30.08.2019

2 Object

This document is the proposal of ISP SYSTEM for the supply of 4 spare actuators compatible with B3 type vertical and periscope mounts for L3 laser.

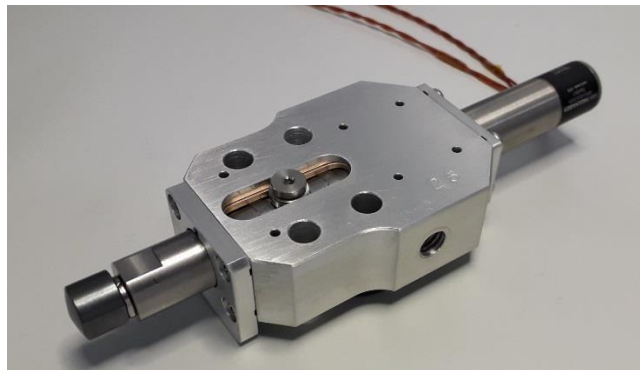

Figure 1: Example of actuator

3 Definition of actuators and services

Actuators are described in the datasheet 18A0974FPI0037-A, they have exactly the same definition as the ones delivered with the L3 mounts.

Actuators will be cleaned according to the same specification as the actuators for B3-type L3 mounts, no RGA test will be performed on actuators.

They will be packaged in a ISO5-compatible packaging after final cleaning and UV-lamp inspection in ISO5 clean room.

A simple functional test will be performed on each actuator to confirm the correct assembly, without any detailed control report (just confirmation that they work properly).

4 Delivery time

- Delivery of 4 actuators: 2-3 weeks after reception of order (components are available at ISP SYSTEM for this batch of 4 actuators)

5 Price

The total price for the delivery of 4 actuators is **7 200** euros (1 800 €/part) excluding VAT.

Remark: As we still had some components on stock, we benefit of the components price for a larger batch. For future orders, the price might be slightly higher, according to the quantity.

Payment terms : 30 days net after delivery, DDP ELI-Beamlines

6 Other conditions

Warranty: 1 year.

See our global sales conditions (<http://www.isp-system.fr/?s=cgv>)

7 Customer agreement

Work will start after written agreement of customer

Laurent ROPERT
