Subject: Gravimeter calibration

We send you gravimeter LCR G No. 1068 for calibration. Last autumn, the gravimeter has shown a small barometrical effect. Unfortunately, the meter has stopped measuring after a pair of measurements this year. The beam is not visible in the eyepiece (even by clamping). After unclamping the el. beam makes some movement but then it rapidly returns to the left side but in the eyepiece is not visible any movement.

Total price: 6 000 USD.

Please, invoice send to e-mail address zu.praha@cuzk.cz in PDF format or isdoc/isdocx format (version 5.2 or higher).

Yours sincerely
