Subject: Mestrelab Order 1270/2016 - UOCHB PO 04.54/16

Dear Radek and Anna,

Many thanks for your order! This email confirms that your campus upgrade and annual Updates & Support package have been extended through to the 19th of April 2018. Please keep this email for your records, as proof of extension.

In the enclosed file you will find the electronic Invoice and your license files for the Mnova Suite (150 users) + DB (100 users) with the extended Update & Support date (2 zip files attached).

Please ensure you have the latest version of the license server available, which you can download from the following link: <http://www.mestrelab.com/mlicserver>. There you will find the direct download links of the license server per operating system, as well as the license server installation manuals. You will need to repeat steps 5 and onwards (entering IP address, etc) to set up the license server correctly.

Once you have activated the new license file, the end users can then go on and download the software on to the client machines from <http://mestrelab.com/software/mnova-suite/download/>.

And finally, we have a section of our web site where we list some of our most reputable users, both in academia and industry. I would be very grateful if you could confirm whether you would be happy for just the name of your company to appear in this listing.

Many thanks once again for taking the decision to upgrade and support our project. Please feel free to contact us at support@mestrelab.com if you have any further questions.

Yours sincerely,

Cristina
