

ZMĚNOVÝ PŘÍKAZ č. 2 k POKYNU K REALIZACI č. 24

dle Smlouvy o dílo ze dne 28.6.2010 mezi Dopravním podnikem hl. m. Prahy, akciovou společností, a AŽD s.r.o., ve znění pozdějších dodatků, na jejímž základě má být realizována zakázka nazvaná „Komplexní bezpečnostní systém pro Dopravní podnik hl. m. Prahy, akciová společnost“, sestávající zejména z dodávky a implementace bezpečnostní techniky, informační a komunikační technologie a drážní zabezpečovací techniky, to vše v rámci pražského metra (dále jen „Smlouva“).

Dopravní podnik hl. m. Prahy, akciová společnost,

se sídlem Praha 9, Sokolovská 217/42, PSČ 190 22

IČ: 000 05 886, DIČ: CZ 00005886

zapsaná v obchodním rejstříku vedeném Městským soudem v Praze, oddíl B, vložka 847

jednající: Ing. Petr Witowski, předsedou představenstva, a Ing. Ladislavem Urbánkem,

místopředsedou představenstva

jako Objednatel dle Smlouvy

a společnost

AŽD Praha s.r.o.

se sídlem Praha 10, Žirovnická 2/3146, PSČ 106 17

IČ: 480 29 483, DIČ: CZ 48029483

zapsaná v obchodním rejstříku vedeném Městským soudem v Praze, oddíl C, vložka 14616

jednající: Ing. Romanem Juříkem, jednatelem

jako Zhotovitel dle Smlouvy,

schvalují podle bodu 7.3 Smlouvy následující Změny Pokynu k realizaci č. 24 ze dne 15.11.2018 (dále jen „Pokyn“):

Změna se týká bodu 1. Rekonstrukce PTV a doplnění ve stanicích trasy A, B, C a depech DH, DZ, DK

Obsah Změny:

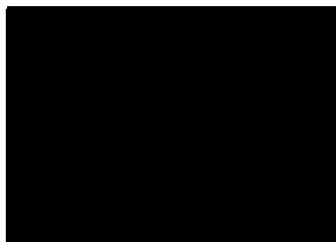

1. Na základě požadavku Objednatele a uskutečnění záběrových zkoušek došlo ke změně umístění a typu kamer a s tím souvisejících dalších komponent. Změna optických převodníků z důvodu ukončené výroby. Doplnění pracovišť na základě místních šetření. Jedná se o změnu ve stanicích Hostivař, Malostranská, Staroměstská, Skalka a Depo Hostivař.

Výše popsaná Změna byla v souladu se Smlouvou Zhotovitelem i Objednatelem oboustranně schválena.

Změna nemá dopad do harmonogramu realizace.

Pokyn se touto Změnou **snižuje** celkem o **1 371 642,15 Kč** bez DPH. Konkrétní dopady změn jsou vyznačeny v příložených výkazech Výměř.

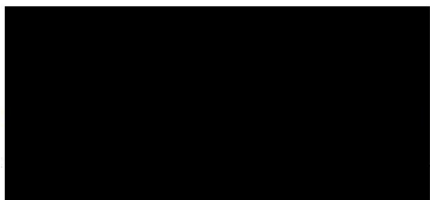

V Praze dne **14 -10- 2019**

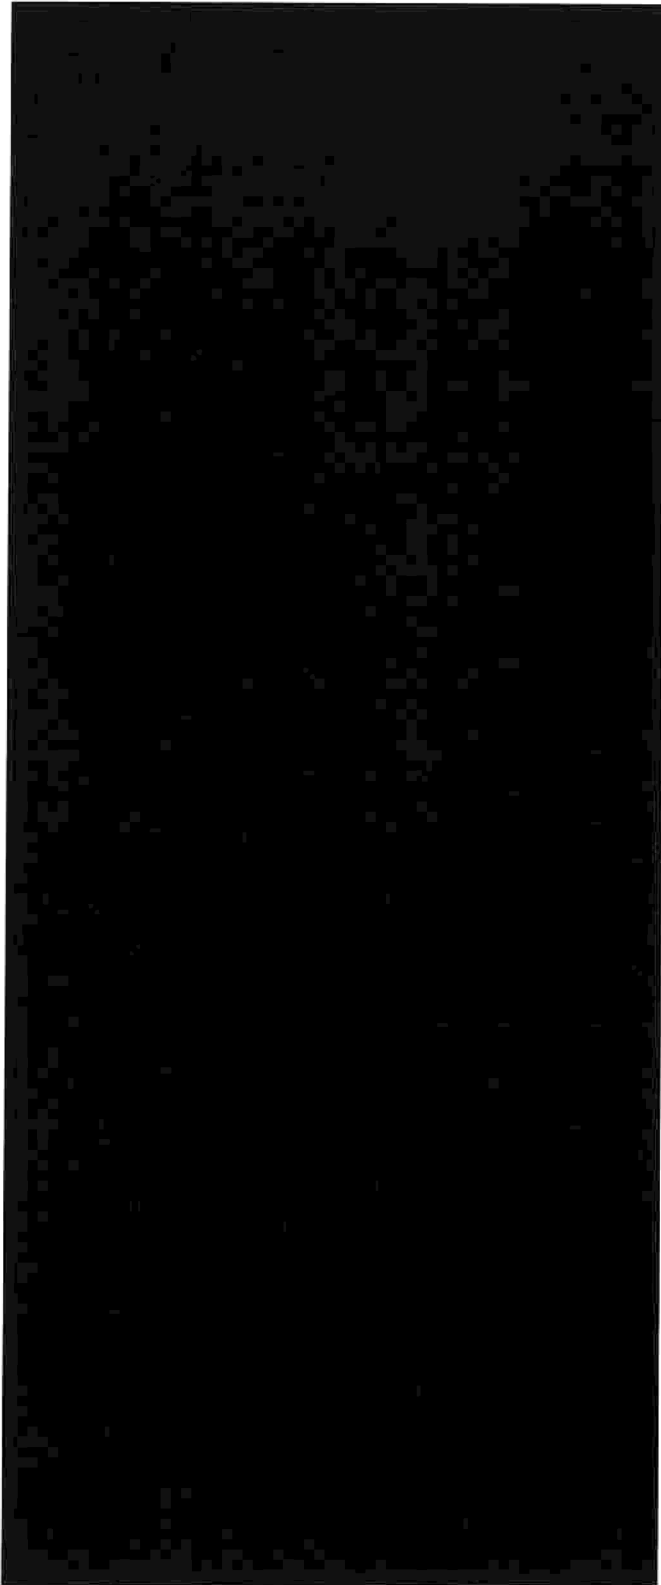

**Dopravní podnik hl. m. Prahy,
akciová společnost**
Ing. Petr Witowski,
předseda představenstva

AŽD Praha s.r.o.
Ing. Roman Juřík,
jednatel

**Dopravní podnik hl. m. Prahy,
akciová společnost**
Ing. Ladislav Urbánek,
místopředseda představenstva

The first part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The second part of the paper focuses on the role of the auditor in identifying and assessing risks. This involves a thorough understanding of the client's business and its internal controls. The third part of the paper discusses the importance of communication between the auditor and the client. This is essential for ensuring that the auditor has all the information needed to perform the audit effectively. The fourth part of the paper discusses the importance of maintaining independence and objectivity. This is essential for ensuring that the auditor's conclusions are unbiased and reliable. The fifth part of the paper discusses the importance of maintaining confidentiality. This is essential for ensuring that the client's information is protected and not disclosed to unauthorized parties.

The following table provides a summary of the key points discussed in the paper.

Topic	Key Points
Record Keeping	Essential for integrity of financial statements and providing a clear audit trail.
Risk Assessment	Involves a thorough understanding of the client's business and its internal controls.
Communication	Essential for ensuring the auditor has all the information needed to perform the audit effectively.
Independence and Objectivity	Essential for ensuring that the auditor's conclusions are unbiased and reliable.
Confidentiality	Essential for ensuring that the client's information is protected and not disclosed to unauthorized parties.

In conclusion, the paper highlights the importance of maintaining accurate records, identifying and assessing risks, communicating effectively, and maintaining independence and objectivity. These are all essential for ensuring the integrity and reliability of the financial statements. The paper also emphasizes the importance of maintaining confidentiality and protecting the client's information.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (1990-2000).

There is a growing awareness of the need to improve the health and well-being of older people, and to reduce the burden of illness and disability. This has led to a number of initiatives, including the development of the National Health Service (NHS) and the creation of the Department of Health.

The NHS is a public health service that provides a range of services, including primary care, hospital care, and community care. It is funded by the government and is free at the point of use.

The Department of Health is responsible for the overall health of the nation. It sets the national health policy and oversees the NHS. It is also responsible for the regulation of health care professionals and the pharmaceutical industry.

In addition to the NHS and the Department of Health, there are a number of other organizations that are involved in the care of older people. These include local authorities, voluntary organizations, and private care providers.

The care of older people is a complex task that requires a multi-disciplinary approach. It involves the collaboration of a range of professionals, including doctors, nurses, social workers, and care workers.

There are a number of challenges that are associated with the care of older people. These include the need to provide a high quality of care, to ensure that care is personalized to the needs of the individual, and to manage the costs of care.

There are a number of ways in which the care of older people can be improved. These include the development of new services, the training of care workers, and the promotion of self-help and community care.

The care of older people is a priority for the government and the NHS. It is a challenge that requires a multi-disciplinary approach and the collaboration of a range of professionals.

There are a number of ways in which the care of older people can be improved. These include the development of new services, the training of care workers, and the promotion of self-help and community care.

The care of older people is a priority for the government and the NHS. It is a challenge that requires a multi-disciplinary approach and the collaboration of a range of professionals.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail.

2. The second part of the document outlines the various methods used to collect and analyze data. These methods include direct observation, interviews, and the use of statistical models to identify trends and patterns.

3. The third part of the document describes the results of the study. It shows that there is a significant correlation between the variables being studied, and that the findings have important implications for practice.

4. The fourth part of the document discusses the limitations of the study and suggests areas for future research. It is important to recognize the constraints of the current study and to identify ways in which the research can be improved.

5. The fifth part of the document provides a conclusion and summarizes the key findings. It emphasizes the need for continued research in this area and the potential for further discoveries.

6. The sixth part of the document contains a list of references and a list of figures. The references provide a comprehensive overview of the literature on the topic, and the figures illustrate the data used in the study.

7. The seventh part of the document is a list of appendices, which provide additional information and data that are not included in the main text.

Effect of Stimulus Control on the Acquisition of a Complex Skill

John M. McDonnell, Robert M. G. Durbin, and Robert M. G. Durbin

Department of Psychology, University of North Carolina at Greensboro, Greensboro, North Carolina

Three experiments examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 1 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 2 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 3 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 4 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 5 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 6 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 7 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 8 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 9 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 10 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 11 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 12 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 13 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 14 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 15 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 16 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 17 examined the effects of stimulus control on the acquisition of a complex skill.

Experiment 18 examined the effects of stimulus control on the acquisition of a complex skill.
