## 1. Introduction

This procedure describes how the 4M MC Coordinator creates a Daily Operational Report at the end of a market coupling session. There is no particular timing constraint to start this procedure.

### 1.1. Summary

The purpose of this report is that the 4M MC Coordinator shares information with all PXs and SP, in particular to provide an overview of the process timings. Although officially it has to be executed by the 4M MC Coordinator, any PX using PCR asset is able to run it.

### 1.2. Governed / Regulated by

████████████████████  
 ████████████████████

### 1.3. Associated procedures

#### In normal situation

- NOR\_07: Final Confirmation of the Results: The previous process must have been successfully completed.

#### In backup situation

As soon as an event happens that prevents the normal performance of a process, the operators refer to procedure BUP\_08.
