2. Product Description

EBSCO Discovery Service

Single solution to discover all library resources

Discovery solutions have become a critical component within most research library systems, playing a vital role in the effort to showcase the value of a library's collection, providing a unified index and changing the way resources are searched. EBSCO Discovery Service takes research to the next level through a perfect combination of content and technology. EDS provides a fast, streamlined search through a single search box, but within the context of a greater experience that pulls together intuitive features and functionality, high-end indexing via Inclusion of Subject Indexes, and instant access to critical full text, leveraged from the leading EBSCOhost research platform and databases, as well as from key information providers. More information about EBSCO Discovery Service you can find [here](#).

Benefits for EBSCO users:

- High quality content - Full Text peer-reviewed journals providing research community with a multidisciplinary content and allowing researchers to deepen and broaden their research.
- Support of research community through journal licensing that is free of charge. EBSCO is working on increasing the local quality content through cooperation with local publishers that meet academic criteria and increasing their visibility worldwide. EBSCO databases and discovery technologies are the most-used, online information resources for tens of thousands of institutions worldwide, representing millions of end-users.
- Free of charge online and on-site trainings by EBSCO training specialists.
- Dedicated team that supports technology needs of our users and helps libraries support their end users and improve access to information.
- EBSCO's long-term experience and presence in the market with more than 70 years of partnership with corporations, hospitals, academic, scientific and research institutions all over the world. Providing quality research content, powerful search technologies and intuitive delivery platforms.
