Quote No: NVHK2021011301
 Date Issued: 13th Jan 2021
 Validity: 60 days

We are pleased to quote the following:

Project	No.	Part Number/ Description	Qty.	Unit Price (USD)	Line Total (USD)
Pea mRNA Sequencing (Novaseq, PE150, Q30≥80%)	1	Eukaryotic mRNA-seq (Stranded Library prep and sequencing) (20M pair reads/sample) raw data in fastq			
	2	Data Release via AWS			
	Total				USD 5672.00

Technical Terms:

1. Overview of Service

Sample Type	Total RNA Sample
Sample Number	40
Library Type	250~300bp insert strand specific library
Bioinformatics	Data quality control
Turnaround Time	22 working days starting after we receive the library preparation confirmation from client

2. Sample Requirements

We highly recommend that you send your nucleic acid samples dissolved in ddH₂O or TE buffer. For samples dissolved in ethanol or lyophilized, additional extraction fee would be charged.

Sample Type	Remarks	Amount (Qubit)	RIN	Volume	Concentration	Purity
Total RNA sample	Strongly Recommended	$\geq 2 \mu\text{g}$	≥ 6.3	$\geq 20 \mu\text{L}$	$\geq 50\text{ng}/\mu\text{L}$	OD260/280 ≥ 2.0 OD260/230 ≥ 2.0
	Required	$\geq 1 \mu\text{g}$	≥ 6.3			no degradation, no contamination

Samples not meeting these specifications can be designated by the customers as to be processed “at risk”. Novogene have rich experience with samples $\geq 200\text{ng}$ and if library preparation failed, only the cost for library preparation will be charged.

Note: When processed “at risk”, it will be subject to billing regardless of data quality. The turnaround time could be extend depending on circumstance.

3. Bioinformatics Analysis

Data Quality Control: filtering reads containing adapter or with low quality.

To order, please send us your purchase order and obtain the Sample Submission Form from us.
