turnitin 

PRIORITIZING RESEARCH ETHICS

iThenticate is a great tool for researchers and postgraduate students.

I've been advising my students to use it regularly and been giving lectures about research ethics and iThenticate is my only example. Thank you!

 Jordan University of Science & Technology

Thank you for the opportunity to submit this proposal to provide Czech Advanced Technology and Research Institute with a solution to comprehensively check for plagiarism and be able to publish with confidence.

iThenticate is the premier tool for researchers and professional writers to check their original works for potential plagiarism. With an easy to use submission process that checks for similarity against the world's top published works, researchers and institutions can feel confident that their academic reputation will be protected.

About Turnitin

Turnitin is your partner in fostering original thinking and research through its suite of products, including iThenticate. Turnitin solutions promote academic integrity, streamline grading and feedback, and improve outcomes across educational levels and content areas. Turnitin leverages cutting-edge technology to provide tools that prevent plagiarism, deliver formative and summative feedback, surface actionable reporting, and investigate academic misconduct. Growing from one million student paper submissions in 2002 to one billion in 2018, Turnitin serves over 15,000 institutions globally and is headquartered in Oakland, Calif., with international offices in the U.K., Netherlands, Australia, Korea, India, and throughout Latin America.

TRUSTED TO HELP TOP INSTITUTIONS PUBLISH WITH CONFIDENCE

iThenticate is similarity checking software that is used for plagiarism prevention by graduate students, doctoral candidates, faculty and researchers to ensure their work is free from plagiarism. iThenticate's flexible system and comprehensive reporting provides peace of mind in high stakes scenarios such as preparing and submitting grant proposals, preparing a thesis or dissertation, or publishing a research article. As the most trusted plagiarism checking solution, our clients include R1 and R2 institutions, corporate and government research agencies and granting bodies.

Trusted by Top Research Organizations Worldwide:

Duke

Carnegie Mellon University

SWISS NATIONAL SCIENCE FOUNDATION

PURDUE UNIVERSITY

To protect the author and institution's reputation, iThenticate searches submitted papers for content similarity to existing sources. Our proprietary approach couples advanced pattern-matching search and filtering algorithms and compares the uploaded work with an unparalleled content database.

The iThenticate content database includes:

- 47,000 journals and over 69 million articles and documents directly from top publishers
- 70 billion current and archived web pages
- 93% of the top 10,000 journals are included in our database
- 135 million open access content pieces through our partnership with CORE
- 200,000 US Law Reviews
- 800,000 ProQuest Dissertations & Theses
- 170 million published works including books, pre-prints, conference proceedings, journal articles and more

Embedded in the Publisher's Process

Only iThenticate is incorporated into top publisher's workflow and process. Through our exclusive partnership with Crossref, 1,500 publishers license iThenticate and rely on it to check for plagiarism when screening and reviewing article submissions. Institutions and researchers can feel much more confident about their submission and acceptance chances, knowing that by using iThenticate they have the same data and information as the publisher.

Flexible Settings, Collaboration, and Management

iThenticate has a wide variety of settings that help researchers refine their results to evaluate the most critical matches, collaborate with their peers and co-authors, and generate reports that are easy to evaluate and share.

HOW IT WORKS: FLEXIBLE FOR YOUR WORKFLOW

iThenticate provides faculty, researchers, grant writers, and graduate or doctoral students with a comparison database for the evaluation of academic research papers and journal articles. Throughout the granting, researching and writing phases iThenticate can provide valuable support to ensure your work is free from suspicion.

Use iThenticate to:

Review grant proposals to discover any overlap in content or intent prior to submitting the proposal to secure necessary funding

Do a literature review to discover and evaluate the work already present in the field.

Discover authors and journals that might be a good fit as you begin your research

Continuously review manuscript drafts to identify and resolve any citation errors

Collaborate with co-authors, peers, or editors as the manuscript is reviewed and revised

Ensure that the final work, whether grant proposal, dissertation/thesis, or journal article protects the author and institution's reputation

The iThenticate Research Workflow Diagram

Upload Document

Single file, zip file, copy/paste, or compare document to document

Run Similarity

A similarity report is automatically run for each submission

Review Matches

Evaluate color coded matches and sources, easily identified and navigable within the report

Refine Matches

Choose to exclude sources or apply filters to identify the most critical text matches

Adjust & Resubmit

Make changes to your draft and resubmit to continue to improve your document

Folders Settings, Exclusions, and Sharing

Every user receives a default folder, but can easily create, rename, and nest folders to create the organization and workflow that works best for them. Every folder can be configured with default exclusions, such as “No Bibliography” or “No Quotes” that would be applied to every file uploaded to that folder. iThenticate has an extensive set of exclusions and filters to help narrow in on the most critical matches in your document.

In addition to robust folder settings, as a user you can choose to share specific folders with others at your organization. Sharing folders makes it easier to share draft, collaborate with co-authors or peers, and review results without needing to download the similarity report.

User Management to Match Your Organizational Structure

iThenticate offers a variety of options for managing users. Administrators can create named users for each account as they wish. iThenticate supports single sign on via Shibboleth, for ease of adding and managing users. Through Shibboleth, user accounts are authenticated as being assigned user accounts by the institution for current research faculty and graduate students, and are automatically provisioned and signed in to iThenticate.

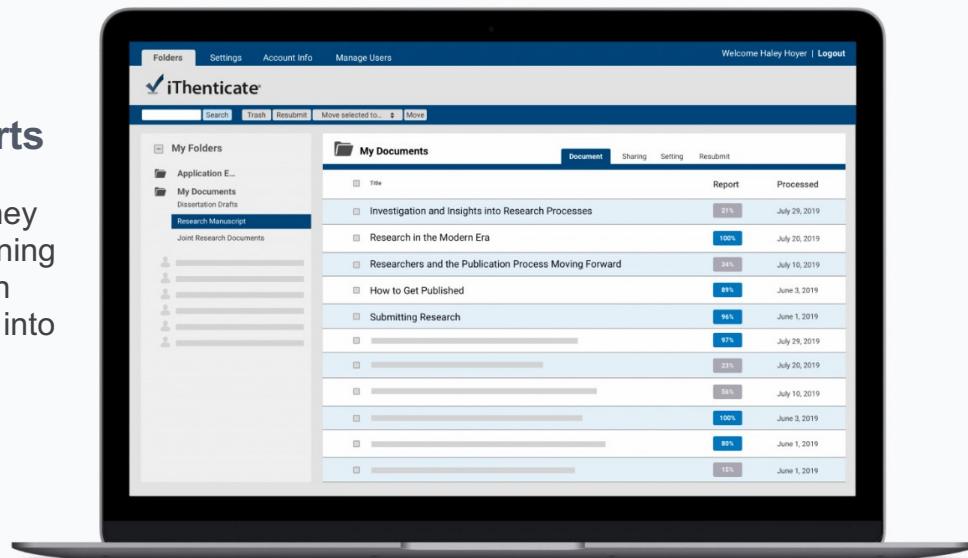

An Easy to Use Similarity Report

The similarity report provides a formatted PDF display of the uploaded document with color-coded matches to make it easy to identify and evaluate matched text. The overall similarity score represents the total percentage of text that matched content in Turnitin’s content database. On-the-go filters and source exclusion make it simple to narrow in on the matches that are most critical. Text can be compared side-by-side to provide a contextual view, but if additional information is desired, every source can be opened in a new window.

Similarity reports can be downloaded as a PDF. The reports are very robust including annotation about the settings applied and all of the sources identified.

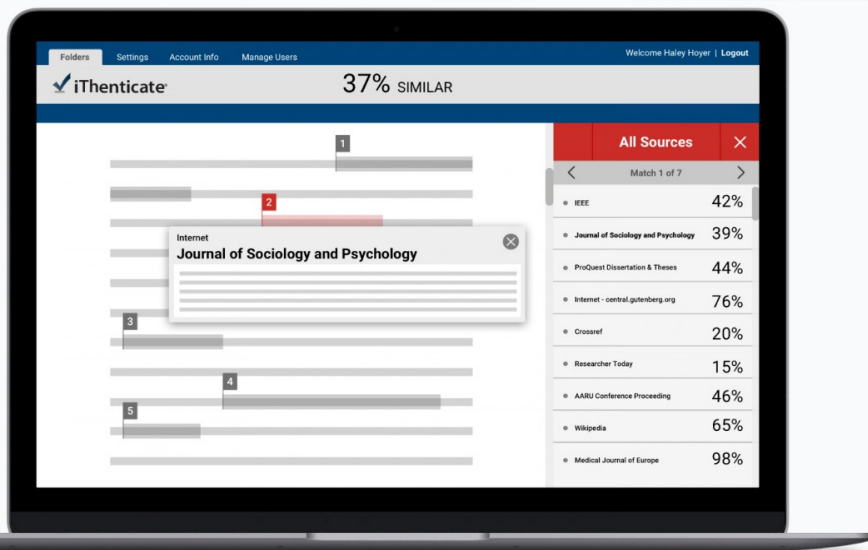

Manage Documents & Reports

Every user has a dashboard where they can create and organize folders containing their uploaded reports. Easy to scan similarity scores give high level insight into their document similarity.

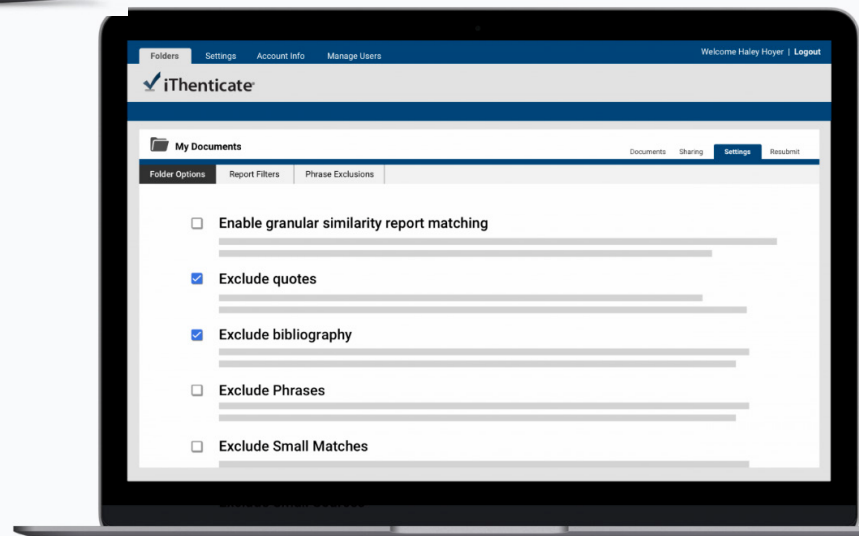

Review Matches & Sources

Hover over matches to review text, view side-by-side, or even apply filters and exclusions within the report. The flexible report viewer lets every user easily navigate and review critical text matches across premium content sources.

Apply Exclusions & Settings

Users and administrators can apply detailed settings at the folder and report level. Customization allows each user the flexibility they need to ensure their final documents are protected from unintended plagiarism concerns.

Top Scholarly Publications

Turnitin continues to develop relationships directly with publishers and open access repositories to ensure that the highest quality content is available for accurate and comprehensive similarity searching. Our content includes 93% of the top cited academic journals, 135 million open access articles across every discipline. As we continue to cultivate relationships with organizations like Crossref and CORE, and directly with publishers and university presses worldwide, our content coverage will continue to expand.

A Curated Internet Archive

In addition to scholarly publications, our proprietary web crawler has been finding and archiving internet pages highly relevant to academia. For twenty years, we've been continuing to identify high priority sites and adding them to our crawler's search map. Each day more than 15 million new pages are indexed, and 68 million are refreshed to ensure our content stays current. More than 70 billion current and archived web pages have been indexed to support complete and accurate similarity detection in iThenticate.

PREMIUM SCHOLARLY PUBLICATIONS

A collection of the top scholarly content, across all disciplines, delivered directly from publishers and Open Access repositories.

3,700
open access repositories crawled weekly

47,000
subscription journals

69 million
subscription articles

>1,700 publishers
from around the world

91% of the top 10,000
journals are included in our database

INTERNET ARCHIVE

Our proprietary crawler targets the websites most likely to be used by students and researchers.

>70 billion
current and archived web pages

68 million
pages crawled and updated daily

15 million
new pages added daily

Turnitin Content is Trusted and Used Exclusively by Top Publishers

Through our trusted relationship with Crossref, 1500 publishers in their network use iThenticate as a fundamental part of the manuscript screening and review process. Publishers rely on Turnitin's expansive content database to surface any potential plagiarism issues prior to publication, protecting the journal's and researcher's reputation.

Optional Content Databases:

ProQuest Dissertations & Theses Database

Choose to include ProQuest's Dissertations & Theses database as a searched content database. This premium database provides 800,000 dissertations and theses from North America. It's an extremely valuable add-on database for researchers in the academic or government sectors, providing some of the most current and emerging research.

Private Repository

If desired, a private repository can be established to store your documents. Administrators can choose whether storing to the private repository is enabled for all users. Every user can choose to store their uploaded document into the private repository. The private repository can be searched against to discover text similarity across the items uploaded at your institution. This can be valuable in detecting research misconduct including self plagiarism. To have Turnitin bulk-upload content into your private repository, there may be an additional fee.

Add Your Own Repositories To Search

Many institutions have local archives (eg for dissertations, research banks, university presses) that they would like to compare new documents against. If you have a repository of content at your institution that you would like to include, please let us know. Turnitin can work with you to include that content. Your institutional rights and privileges remain.

Implementation and Training

Self-guided training is available to all users. By visiting the Support page on the Turnitin website, users have access to a Help Center with articles and answers to commonly asked questions, instructions, and documentation. Turnitin provides extensive online resources for self-paced, on-demand instruction.

Support

Support is available to customers 24 hours a day, 7 days a week, via email, online, and telephone.

Pricing

Year	Product	Number of checks	Price, \$	Total/year
1 01.03.21 – 28.02.22	iThenticate	100	2 500,00	2 500,00
TOTAL				2 500,00

The pricing here is guaranteed until 16.05.2021

THE CONFIDENCE YOU CRAVE

You can never be too certain that even at the highest level that you are always getting original content. iThenticate has provided the kind of safety net that we were looking for.
