Company Background

STREICHER, spol. s r.o. Plzeň is a mechanical engineering company with long-term experience in manufacturing custom equipment, machinery and components in fields where vacuum technology is used.

Our experience in successful partnerships with firms across various industries means that we understand the challenges you face in your business and deliver products and services to aid you in reaching your objectives.

What STREICHER can do for you?

We deliver the following range of services:

- Initial draft study
- FEM-calculation and design
- Manufacturing
- Mechanical, pneumatic, and electrical assembly
- Function cold and hot tests, inspection
- Cleaning and assembly in clean room conditions
- Final assembly and activation

How we deliver?

We have assembled a team of professionals who are experts in their fields to identify client needs and formulate effective solutions for developing an optimal vacuum chamber design.

Our reliable, efficient service is why we have been trusted by technology's global companies with technically demanding products in every corner of the world.

Our team is always on hand to help with anything you need regarding our service.
