I have 75 zircon crystals that were collected from a sedimentary basin for one of my projects supported by Tübitak (Grant number: 117R049). I kindly request your thermochronology laboratory (i) to pack these zircon crystals into Nb tubes,

(ii) calculate their Helium contents by extracting their Helium,

(iii) measure their U/Th ratios by using LA-ICP-MS equipment.

It is possible to complete all of the analyses mentioned above at a price of 100.000 CZK
