    2.1. Process Clarification ..... 7

Annex 1: Contact List - Internal and external communication ..... 28

## 1. Introduction

This procedure describes the principles, the content and the Parties involved in the joint messages that need to be sent when there are incidents or actions taken due to (unexpected) situations such as mentioned in the Incident List or when the Maintenance Window is required.

Note:

- Everywhere in this document where “TSOs” is written, “TSOs and/or any party entitled by the TSOs” is meant.
- Capitalized terms used in the operational XBID procedures have the meaning set forth in Exhibit 1 of the Intraday Operations Agreement (IDOA).

### 1.2 Purpose

The purpose of this procedure is to have standard messages among all Parties and transmit the same information to all external parties.

### 1.3 Governed / Regulated by

- Intra-Day Operational Agreement (IDOA)
- XBID High Level Functional Architecture (HLA) (Exhibit 6 to the IDOA)

### 1.4 Tools and Communication Protocols:

### 1.5 Associated Procedures and Documents

- Backup procedures:
  - XBID\_TSO\_BUP\_01: Submission of Cross-Zonal Capacities
  - XBID\_JOINT\_BUP\_02: Shipping
- Fallback procedure:
  - XBID\_JOINT\_FAL\_01: Incident Management
- Other associated procedures and documents:
  - XBID\_JOINT\_OTH\_03: Change Control Procedure
  - XBID\_JOINT\_OTH\_04: Market Bidding Area Change
  - XBID\_JOINT\_OTH\_05: Maintenance window
  - XBID\_NEMO\_EXC\_03: Closing and restarting of Market Areas, Delivery areas and Trading service
  - XBID\_JOINT\_EXC\_01: Closing and re-opening of Interconnector(s)
  - Contact List - Internal and external communication, including rules for updating/changing contact information (Annex 1 to this document)

## **2. Procedure**

### **2.1. General overview**

#### **Communication principles**

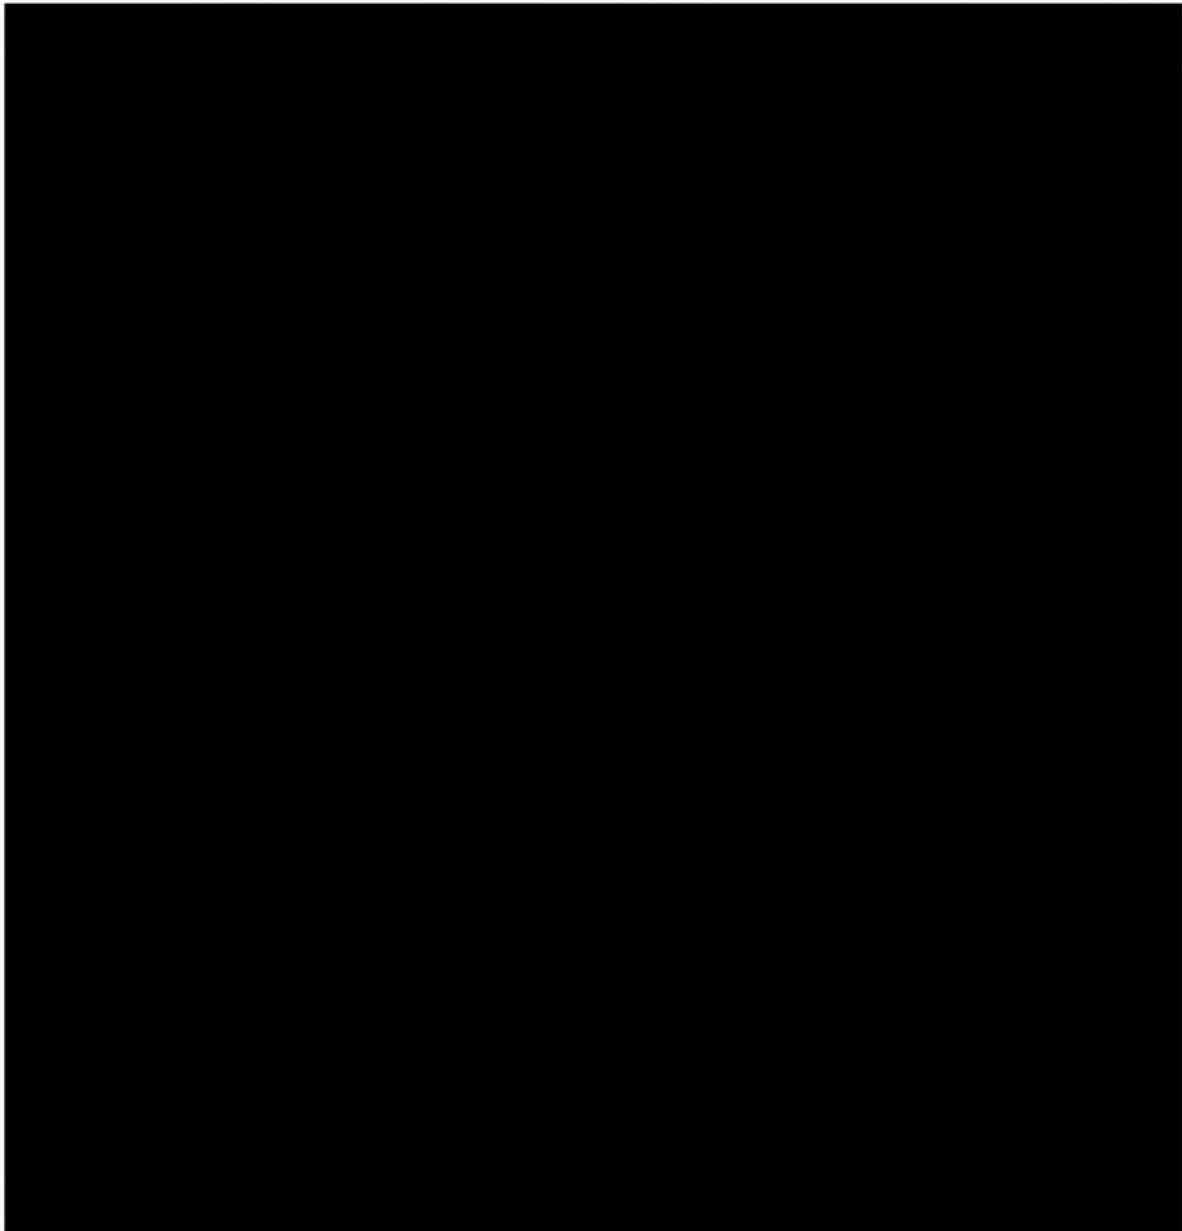

A distinction is made between internal (between TSOs and NEMOs) and external (with Market Participants) communication.

The messages as described in this procedure have to be used. However, Parties may include additional information to these standard messages and if applicable use the relevant unavailability service system for communication.

#### **Distribution list**

Predefined messages will be distributed to the relevant recipients by the individual TSOs (if applicable via the relevant unavailability service system) and/or NEMOs, depending on the specific message, according to the local procedures.

#### **Messages overview**

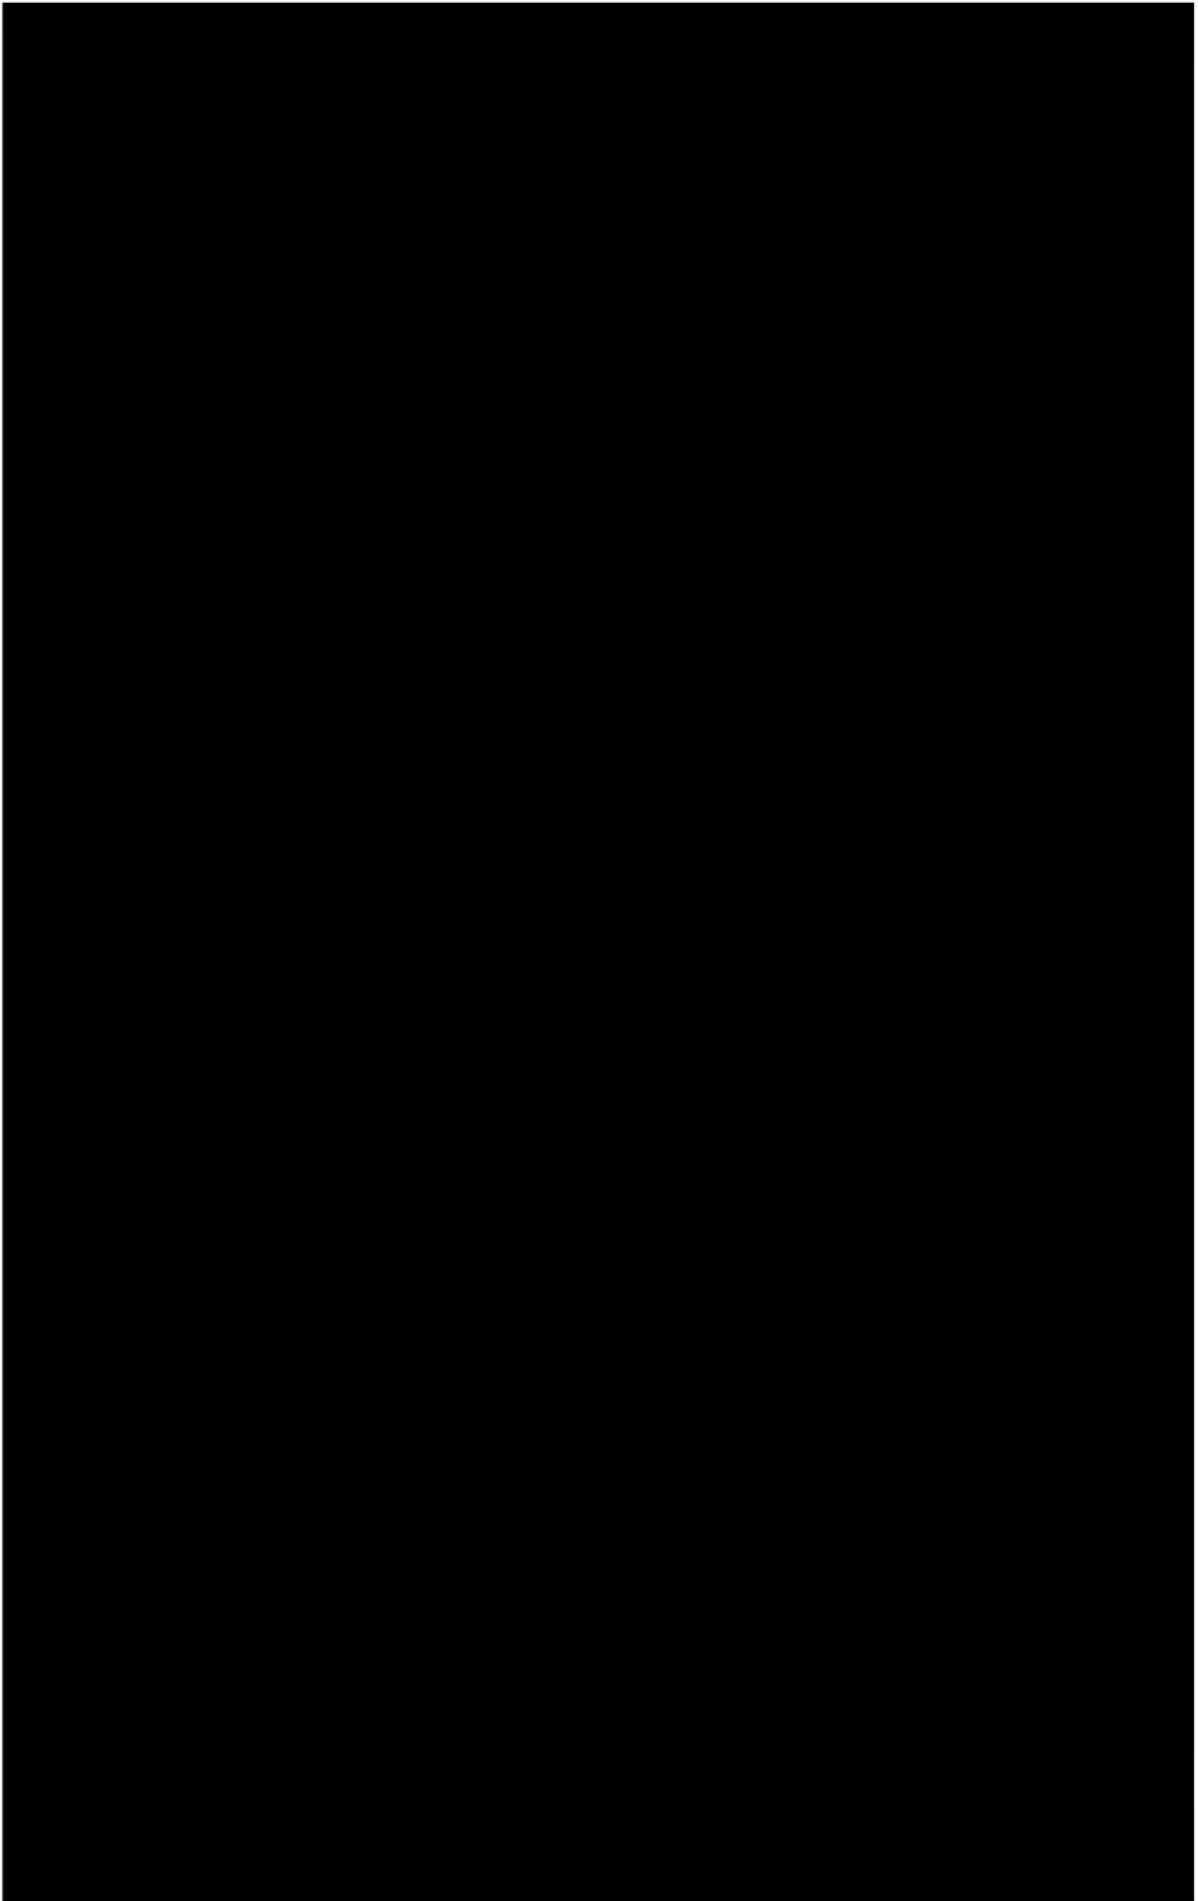

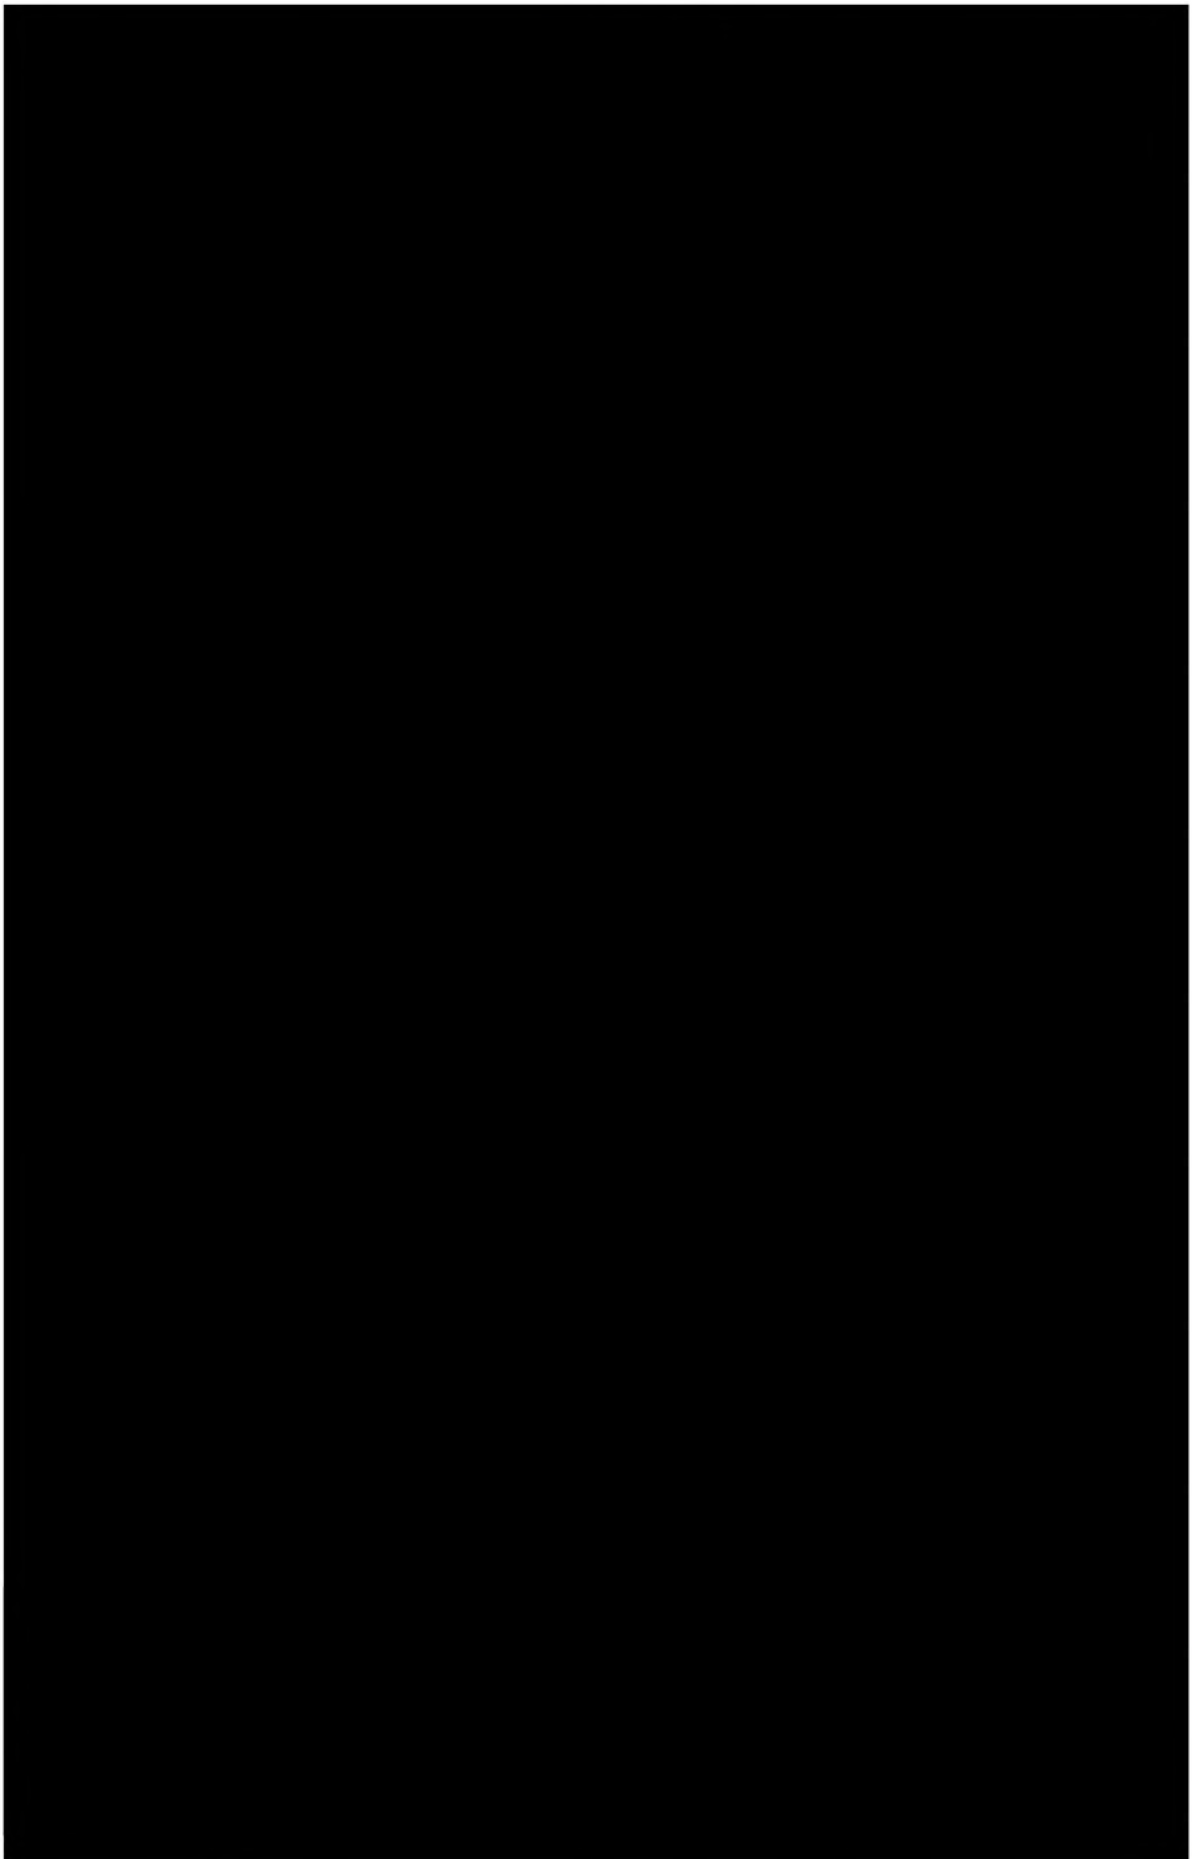

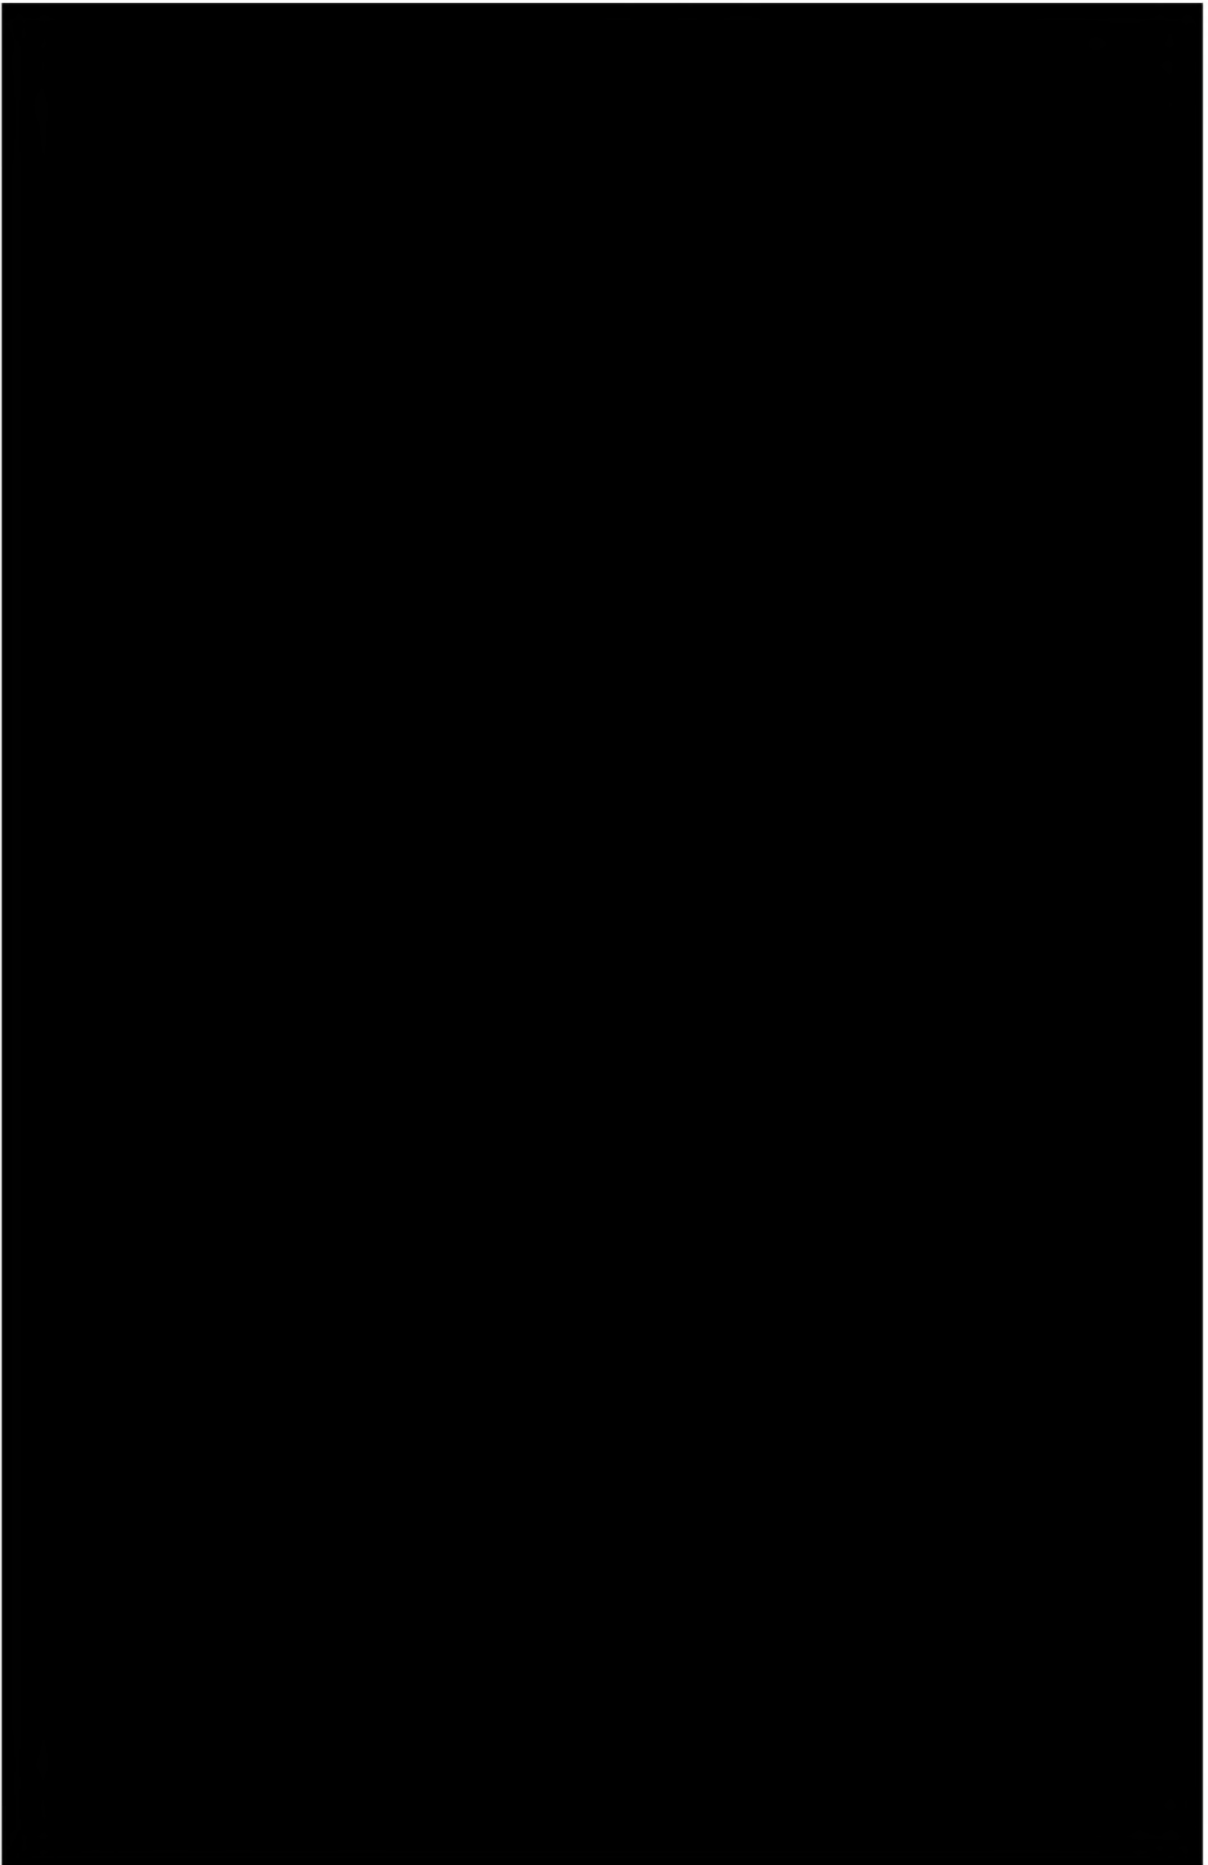

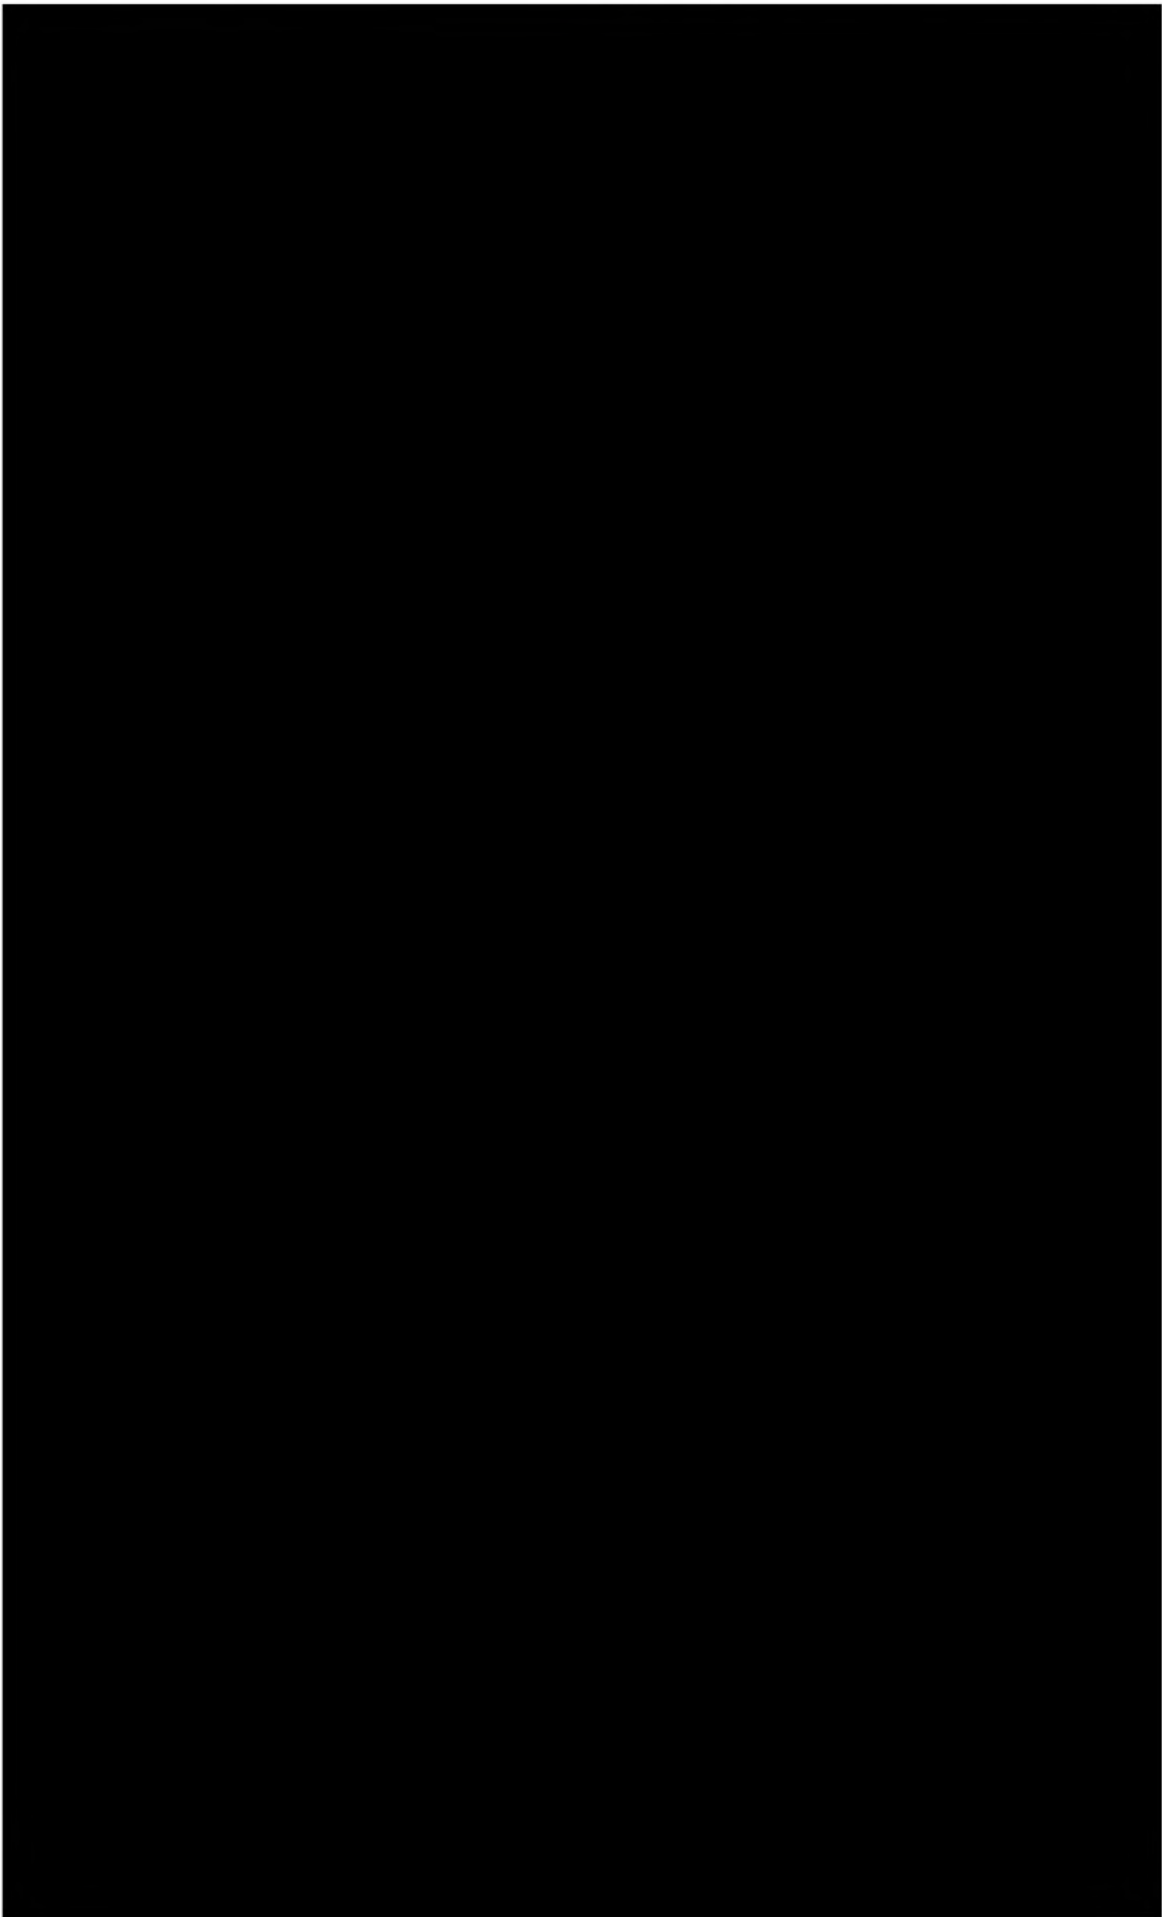

Table 1 – Communication messages

A large black rectangular redaction box covering the entire content area of the table, obscuring all communication messages.
