Quotation for Service Visit - IGA 0243**ITEM 1 (a) Service Visit to investigate admit valve issues**

Estimated 2 days on-site labour

Includes consumables for on-site service work but excludes parts and labour for additional service action if required.

Note: In the event of an instrument failing conformance testing, available options for repair will be offered to the customer and estimated additional parts and labour charges will be provided. Written approval to proceed with repair will be required.

ITEM 1 (b) System Health Check

In order to provide earliest identification of potential major issues, instruments that have not received a routine maintenance visit in the last 18 months, will be subjected to a brief System Health Check on the engineer's arrival. Customers will be notified of the outcome of the System Health Check and any likely additional costs at the earliest opportunity, generally within 1 hour of arrival.
