

**KONTROLNÍ ZÁPIS SPAME s.r.o.**  
dle Nabídky č. 16/2022

**1. Zadání objednávky:**

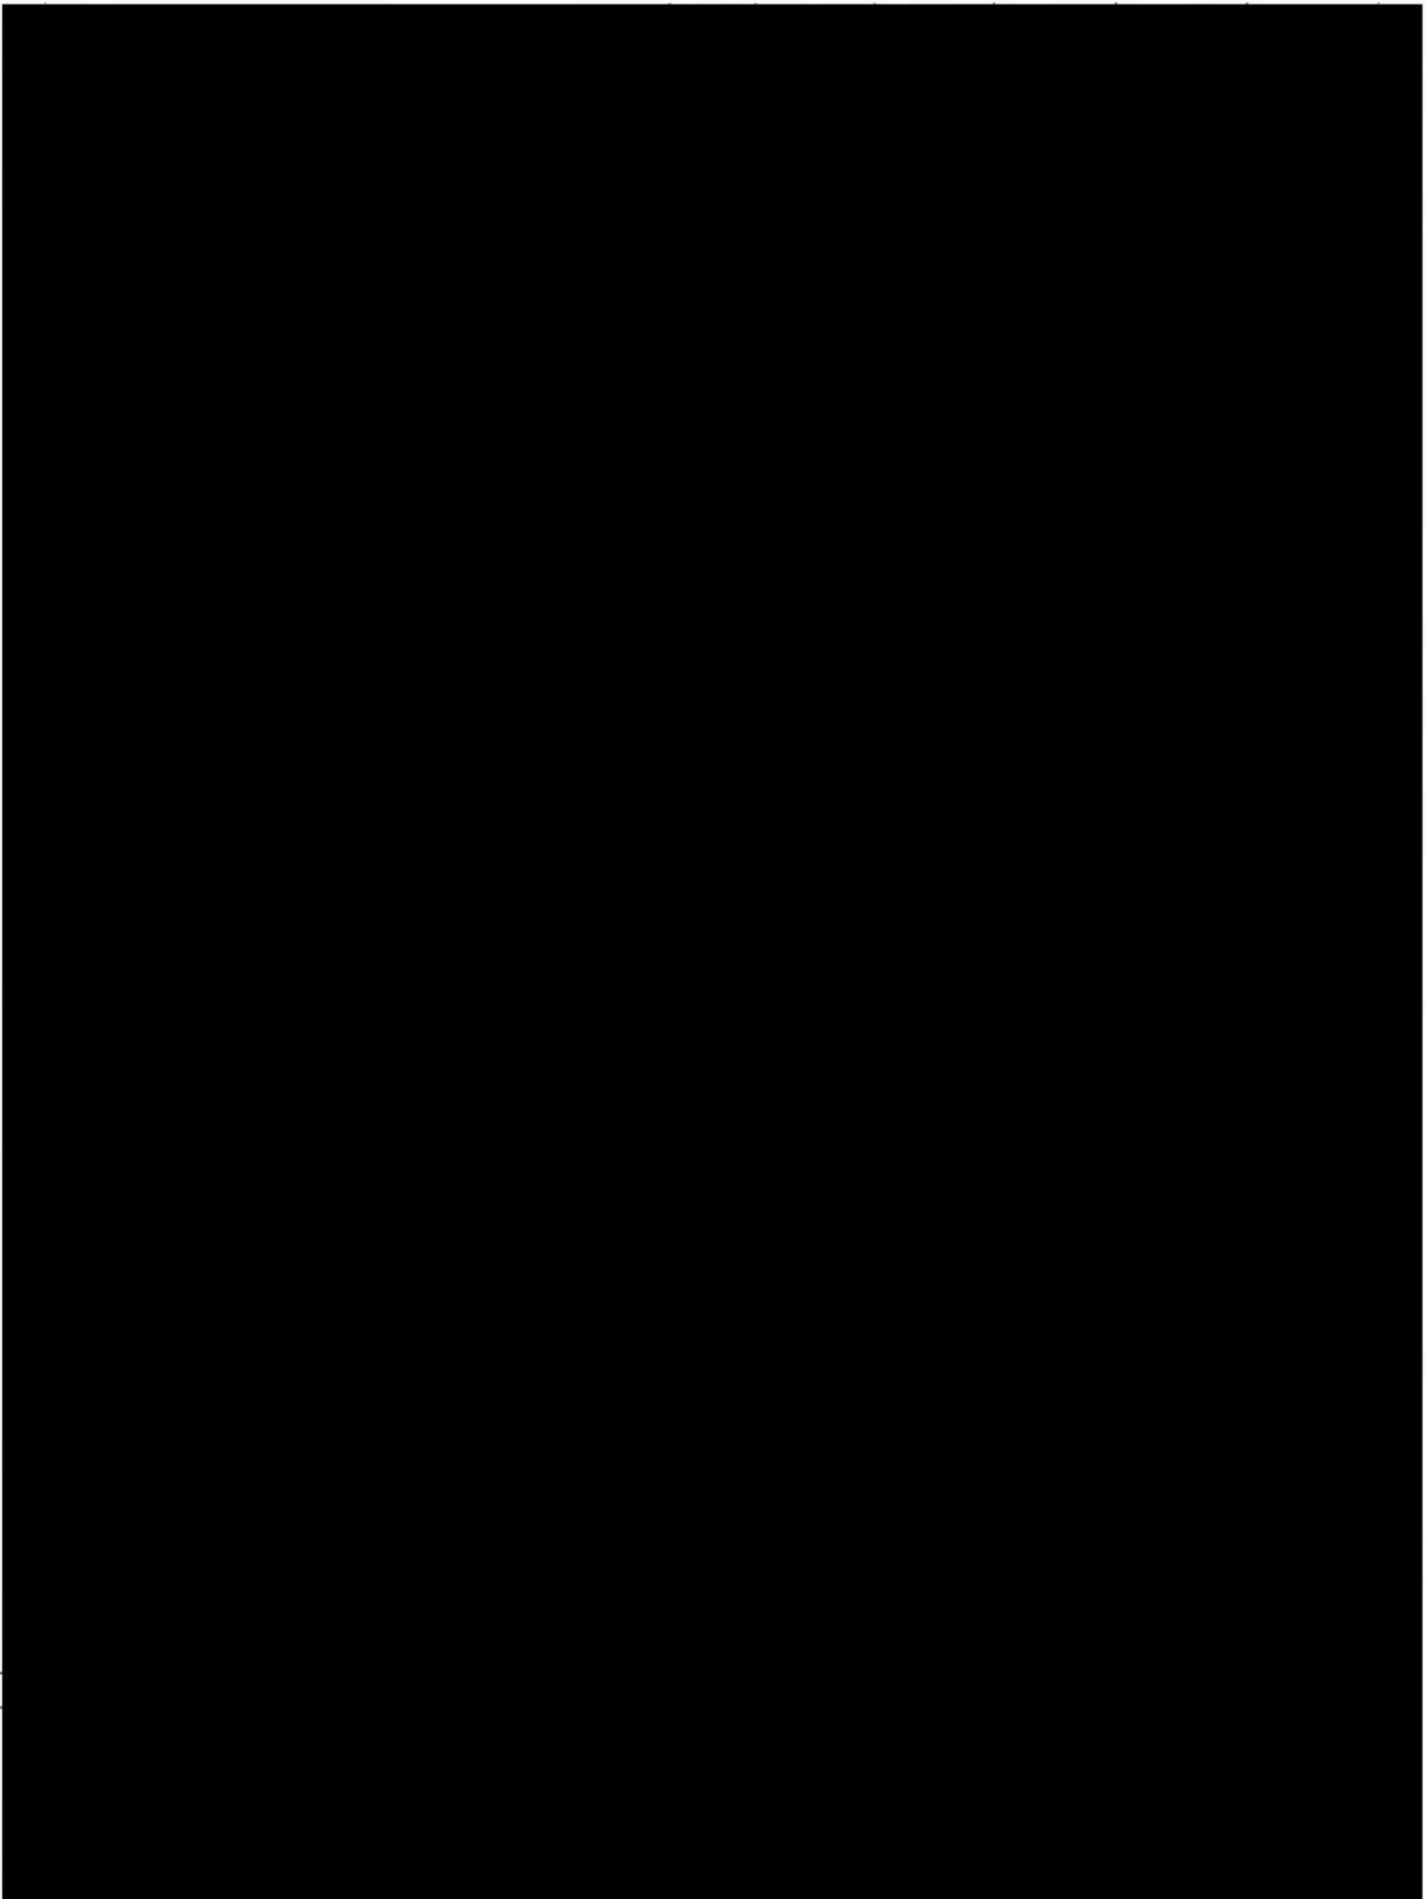

Zjistit technický stav ZDOT, provést celkovou defektační kontrolu dle technické dokumentace výrobce [redacted] zjistit příčiny poruch a závad, zpracovat kompletní nabídku dle ustanovení čl. VI, odst.5 RD.

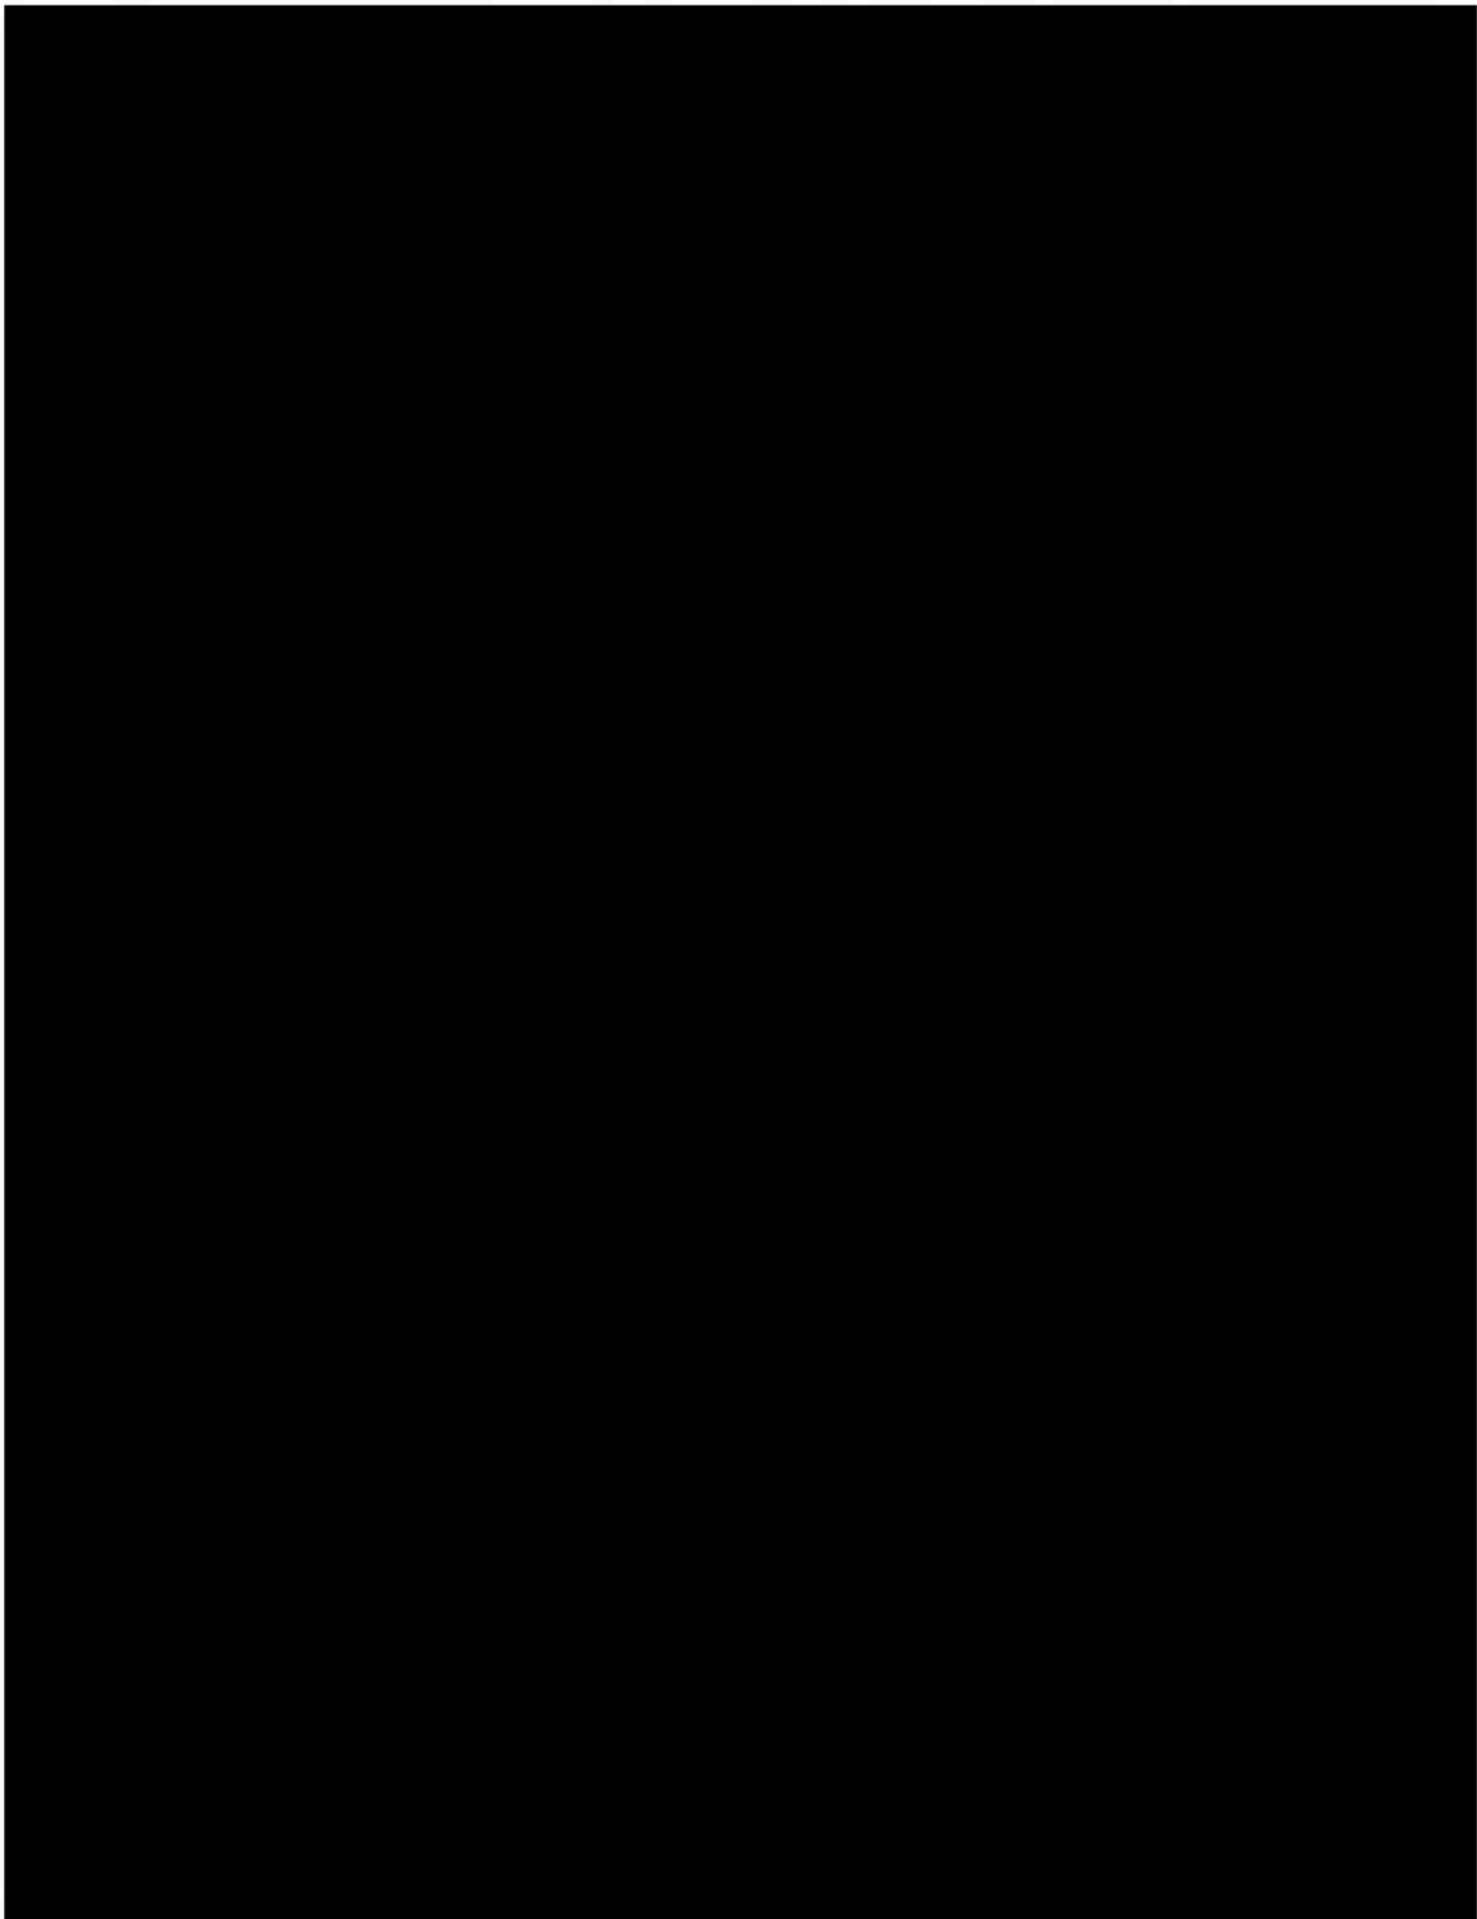

**2. Uživatel techniky, které se kontrolní zápis týká:**

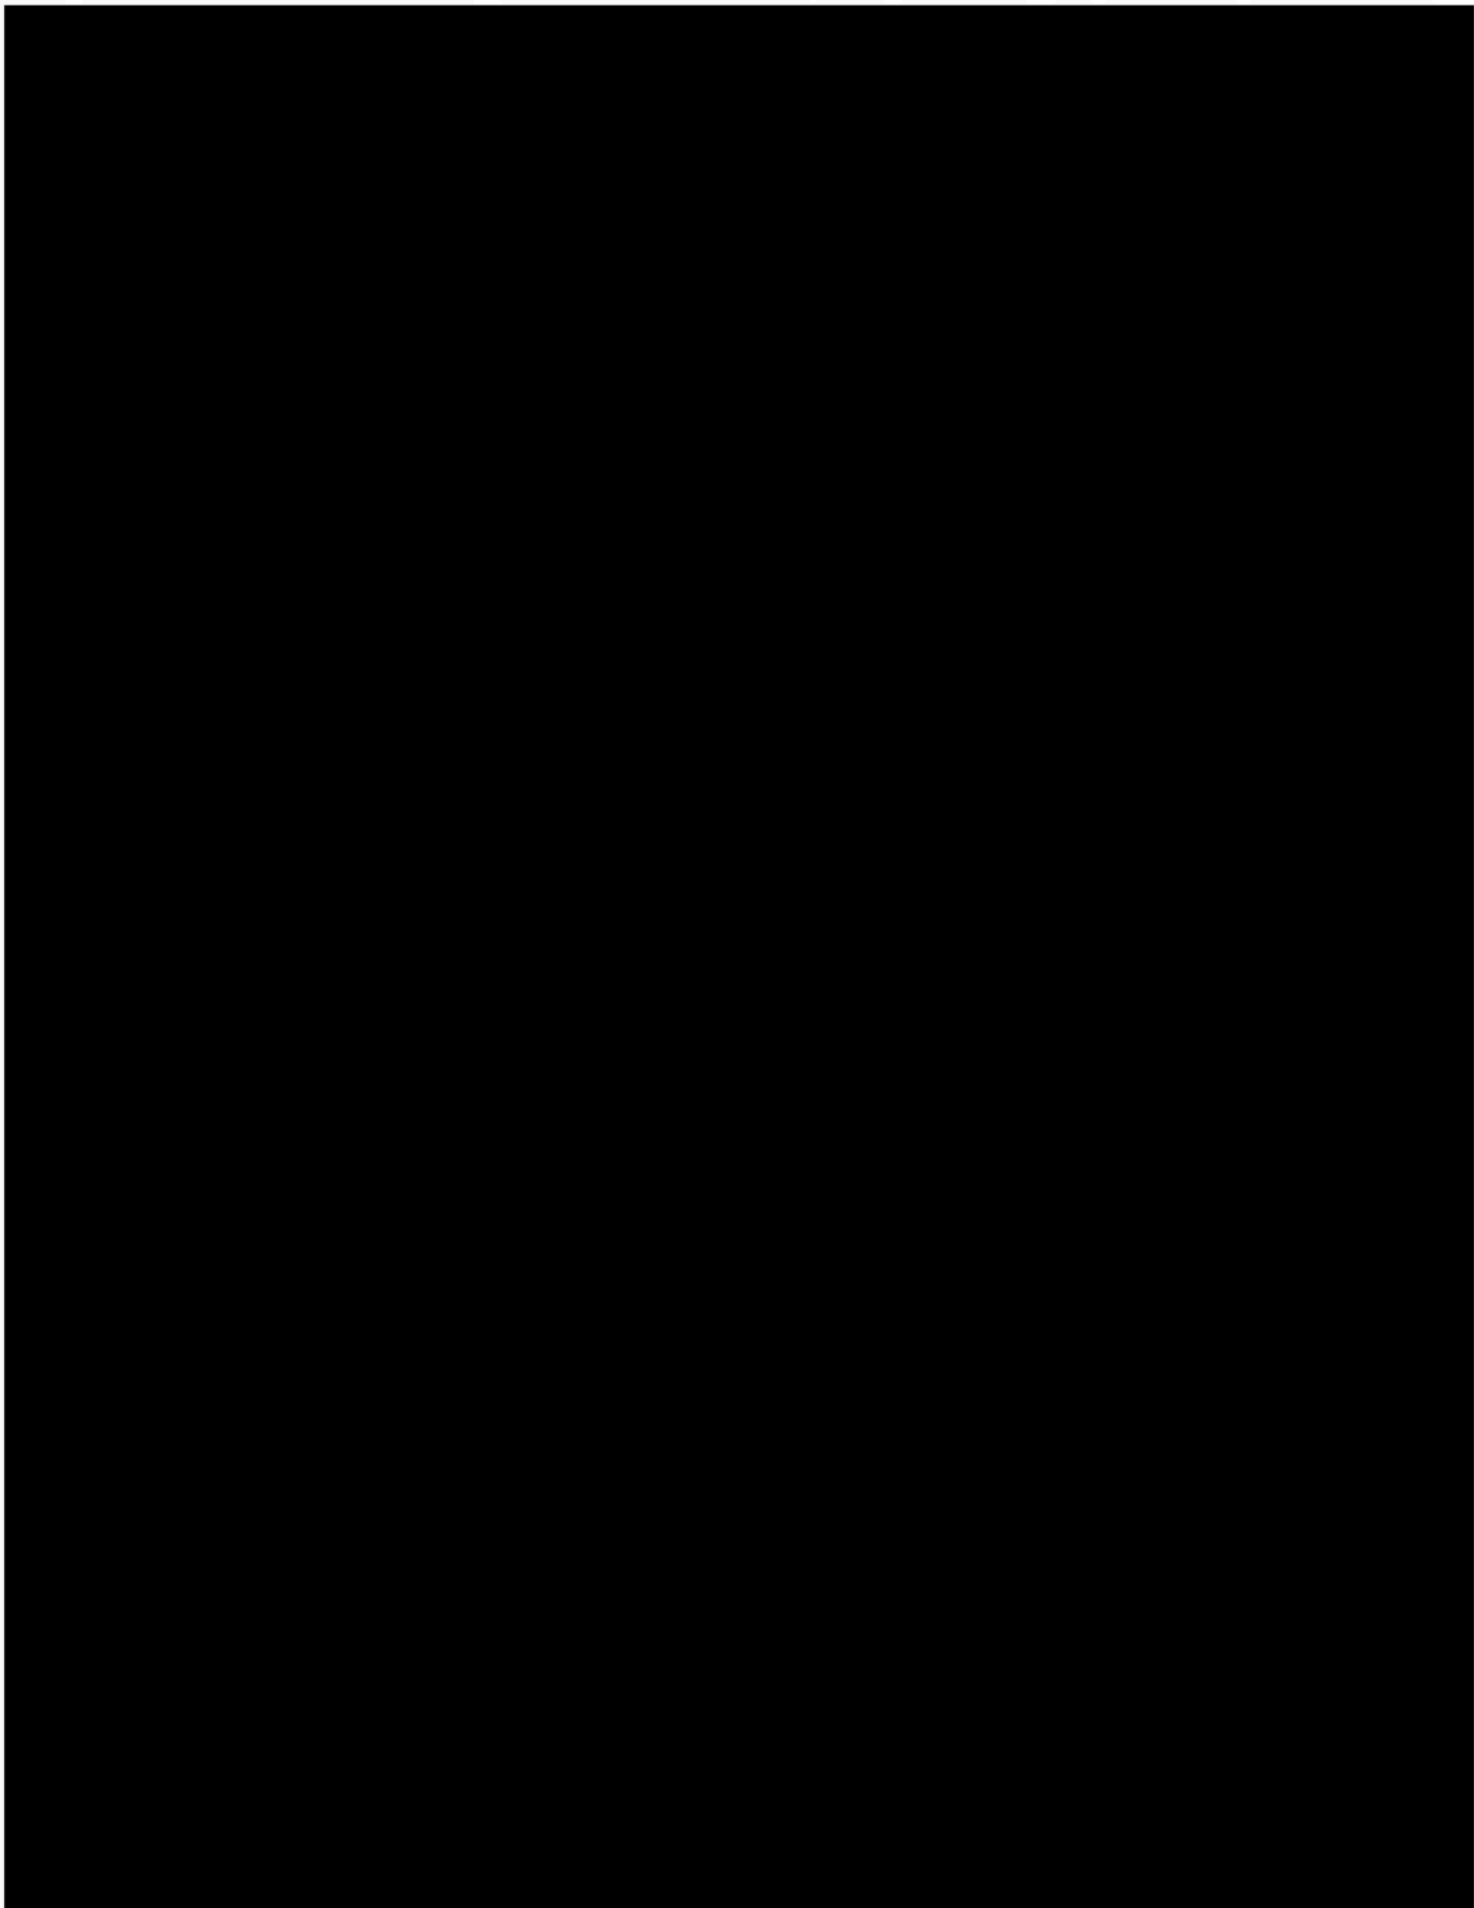

Vojenský útvar :	Dislokace :
[redacted]	[redacted]

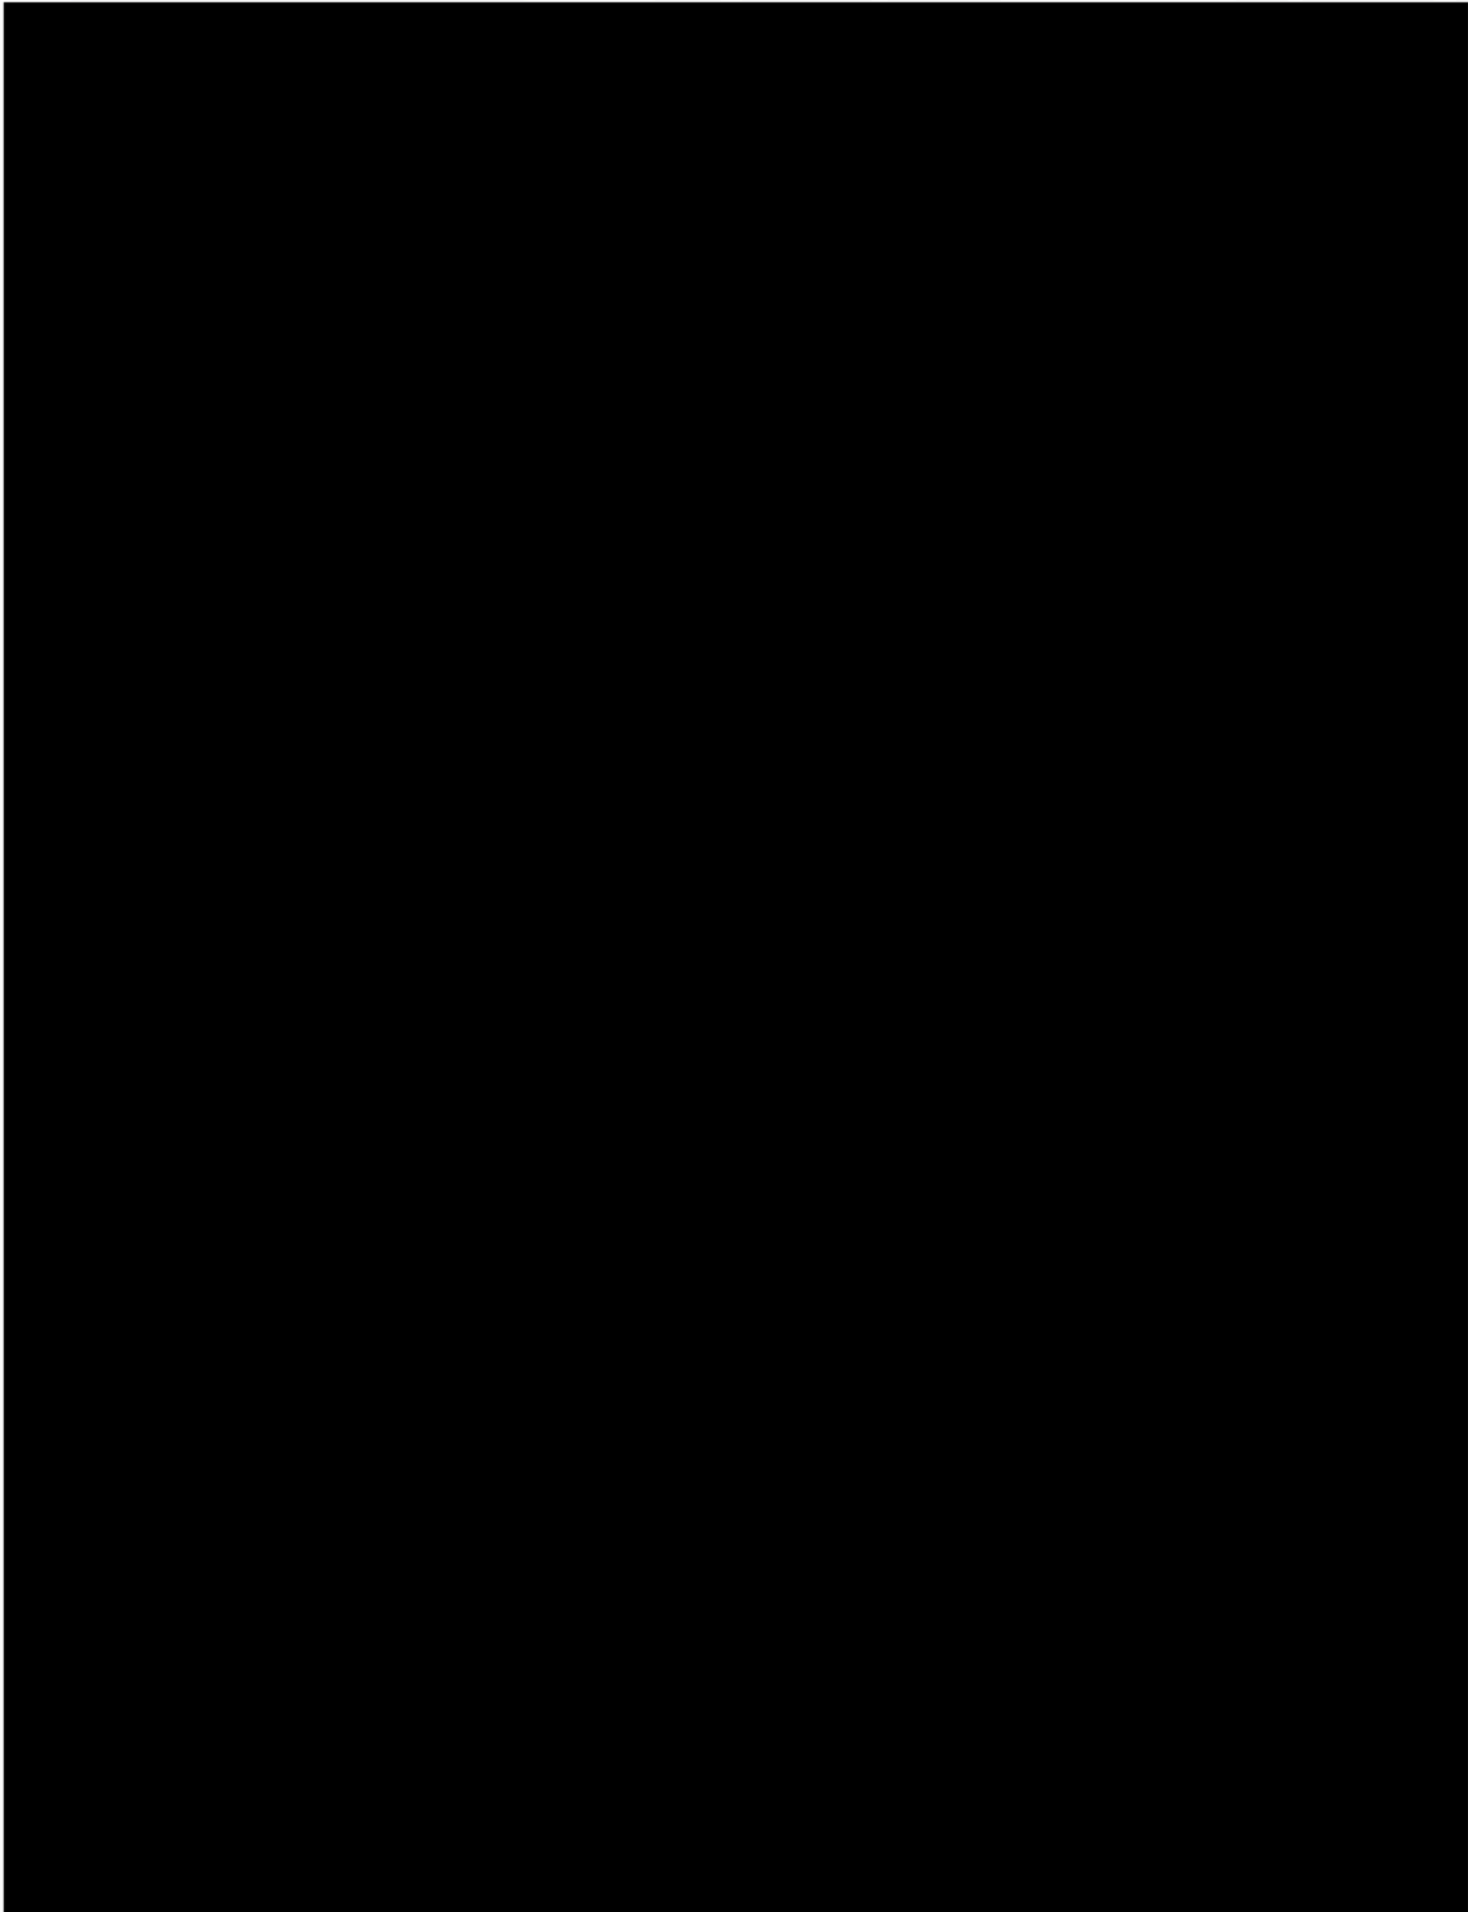

**3. Způsob provedení kontroly:** Zjištění závad.**4. Kontrolní zjištění:** Průstřely, opotřebení, poškození**5. Návrh na odstranění nedostatků:** Kontrola parametrů, oprava**6. Specifikace techniky, rozsah prací, kooperace a ostatních nákladů, spotřeba materiálu:** (Tabulka závad)

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. The Department of Health (2000) has identified the need to ensure that the health care system is able to meet the needs of older people, and has set out a number of objectives for the health care system to meet the needs of older people.

The objectives of the health care system to meet the needs of older people are: to ensure that older people have access to the health care services they need; to ensure that older people receive the health care services they need; to ensure that older people are able to live independently; to ensure that older people are able to participate in the health care system; and to ensure that older people are able to live in their own homes.

The health care system has a number of challenges to meet the needs of older people. The challenges are: to ensure that older people have access to the health care services they need; to ensure that older people receive the health care services they need; to ensure that older people are able to live independently; to ensure that older people are able to participate in the health care system; and to ensure that older people are able to live in their own homes.

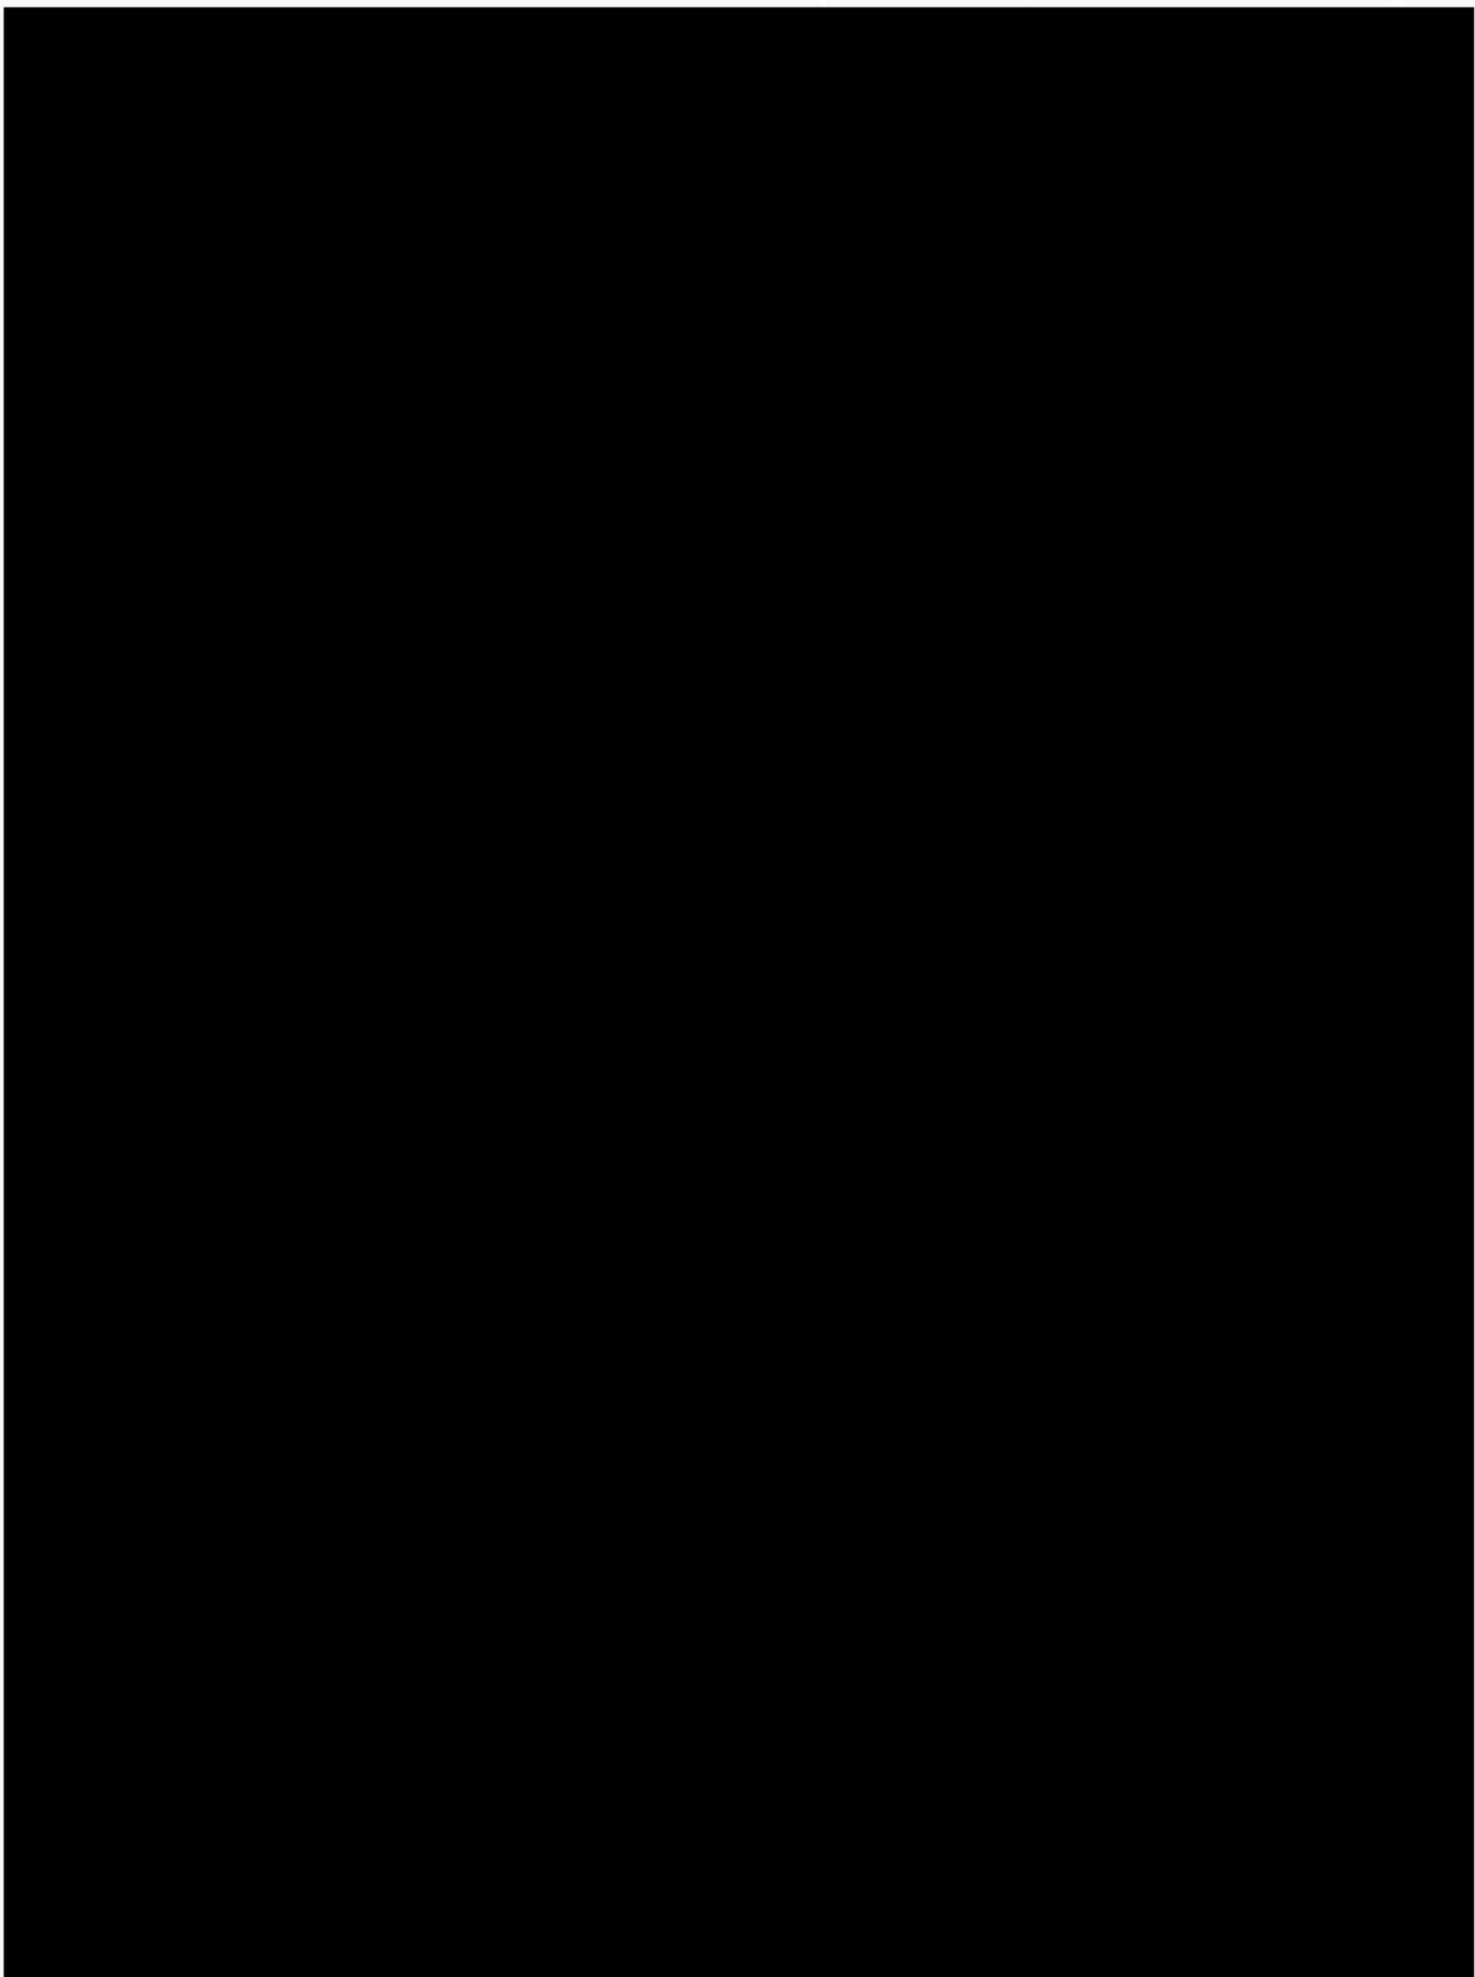

The health care system has a number of challenges to meet the needs of older people. The challenges are: to ensure that older people have access to the health care services they need; to ensure that older people receive the health care services they need; to ensure that older people are able to live independently; to ensure that older people are able to participate in the health care system; and to ensure that older people are able to live in their own homes.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (13.5% of the population).

There are a number of reasons why the number of people aged 65 and over has increased. One reason is that people are living longer. The life expectancy at birth in the UK is 77 years for men and 81 years for women. This is an increase from 71 years for men and 75 years for women in 1950.

Another reason is that people are having children later in life. This means that there are more people aged 65 and over who have children who are still alive. This is because people are having children at a later age than in the past.

There are also a number of reasons why the number of people aged 65 and over is expected to increase in the future. One reason is that people are living longer. The life expectancy at birth in the UK is expected to increase to 80 years for men and 84 years for women by 2020.

Another reason is that people are having children later in life. This means that there will be more people aged 65 and over who have children who are still alive. This is because people are having children at a later age than in the past.
