Offer The data system for particle accelerator

Preamble

IOM and JHI collaborate on the setup and construction of a particle source for surface science and surface engineering, i.e. surface film generation. It will be a modular component of a particle accelerator at IOM in Leipzig.

JHI will perform/deliver the following tasks:

- Selection and purchase of a computer suitable for controlling the particle accelerator
- Design of the structure of algorithms for experiment control
- Delivery of software for basic levels of control, which will be further supplemented according to the requirements of the experiment

The work will be performed during June-August 2020 and the device will be delivered in August 2020 at the latest (delivery time).

Total: 12 300.- EUR

Conditions/terms of payment: The price does include hardware (PC), software, overhead and labor of JHI, but no VAT. The costs have to be paid in advance (80%), i.e., in July of 2020, the rest after the delivery. The offer is valid until July 30, 2020.
