

ITASCA SOFTWARE
EDUCATIONAL DISCOUNT AGREEMENT

Itasca's educational discount is available to accredited degree-granting academic institutes worldwide and is intended to assist college and university instructors who wish to integrate Itasca software into their curriculum and to provide support for University research programs. The educational discount is offered on licenses intended for university-based, academic and research use only. This includes student instruction, graduate thesis research, demonstrations, sponsored research programs, and similar educational activities.

A license receiving the educational discount must not be used for any commercial or revenue-generating purposes, including consulting. Such use violates the terms of an educational license. However, such a license may be utilized to perform non-profit sponsored research activities.

It is Itasca's policy that all licenses have a License Contact. By signing this agreement, the License Contact agrees to the limitations outlined above and agrees to be responsible for the use of the software by all employees, students and staff of the educational institute under which this license is registered as outlined below.

Program: UDEC Software SN 216-420 / UDEC V7.0 Standard License

Serial No.: _____ (to be assigned by Itasca)
Note: A License may have multiple keys and it is understood that this agreement covers all keys under the Serial No., whether they are part of the initial purchase or added at a later date.
