Dear Dr Moraresku,

Re: "Timing of Allocentric and Egocentric Spatial Processing in Human Intracranial EEG"

We're delighted to let you know that your manuscript has been accepted for publication in Brain Topography.

Editor comments

On behalf of your Section Editor, Professor Sauseng, I wish to congratulate you and your co-authors on this achievement. We also wish to thank the reviewers for their constructive engagement in the peer-review process.

Prior to publication, our production team will check the format of your manuscript to ensure that it conforms to the journal's requirements. They will be in touch shortly to request any necessary changes, or to confirm that none are needed.

Checking the proofs

Once we've prepared your paper for publication, you will receive a proof. At this stage, for the main text, only errors that have been introduced during the production process, or those that directly compromise the scientific integrity of the paper, may be corrected.

As the corresponding (or nominated) author, you are responsible for the accuracy of all content, including spelling of names and current affiliations.

To ensure prompt publication, your proofs should be returned within two working days.

Publication policies

Acceptance of your manuscript is conditional on all authors agreeing to our publication policies at:

<https://www.springernature.com/gp/policies/editorial-policies>

Brain Topography is a transformative journal. This means it offers a hybrid publication model. When the journal accepts research for publication, the article may be published using either immediate gold open access or the subscription publishing route. For further information please visit <https://www.springernature.com/gp/open-research/transformative-journals>

Once again, thank you for choosing Brain Topography, and we look forward to publishing your article.

Kind regards,

Micah Murray
Editor
Brain Topography

Reviewer Comments:

Reviewer 3

I think my comments are properly addressed and I believe the manuscript is ready for publication.

Reviewer 2

Thank you for considering all my comments and taking in consideration my advice. I am happy with the revised version and your response. I think the paper will provide valuable insights to the existing literature.
