A cloud-based chemical data repository for the "Proxidrugs" research project - user manual and technical specifications

Software manual and documentation

Comprehensive documentation for the software can be accessed at the following URL: **https://proxidrugs.img.cas.cz/docs/**. The documentation provides users with essential guidance on utilizing the software effectively. It covers the main functionality of the software, including an overview of key features, and basic tutorials for data browsing, filtering and export, their upload/import with detailed file format specifications, and user management.

Hardware recommendations for the users' end devices

Users are strongly encouraged to access the software using a computer that meets moderate hardware and performance standards. Older and slower computers may experience decreased responsiveness and potential compatibility issues that could hinder the software's functionality. To ensure smooth operation and efficient usage, it is recommended to employ a computer with a reasonably modern processor, ample memory, and an up-to-date operating system.

Web browser recommendations for the users' end devices

It is recommended that this software application be accessed and utilized through common web browsers in their up-to-date versions. Compatibility with the latest versions of popular web browsers, such as Google Chrome, Mozilla Firefox, Microsoft Edge, and Safari, is essential to ensure optimal performance, security, and user experience. Staying up-to-date with browser versions enables the utilization of the latest web technologies, enhancements in security protocols, and improved rendering capabilities, thus guaranteeing seamless functionality and minimizing potential compatibility issues. Users are advised to regularly update their chosen web browser to benefit from the most recent improvements and to guarantee the software's stable and efficient operation.

Disclaimer

The software provider shall not be held liable for any issues, malfunctions, or suboptimal performance of the software that arise due to the use of outdated web browsers or hardware. Users are advised to ensure their operating system and web browser are up-to-date and their hardware meets the recommended specifications to guarantee the best possible experience while using the software. Any difficulties resulting from the utilization of outdated components lie beyond the scope of the software provider's responsibility.
