LP-440L	The LP-440L Micropositioner is intended for probing applications in the testing and analysis of silicon wafers, substrates, and dies in the semiconductor industry. It provides 3-axis motion with .300" movement on each axis. Motion is controlled by three inline adjustment screws with 40 threads per inch. Precision high-quality 440 stainless steel ball bearings allow precise linear motion on all three axis. Gibs and Slides are made of heat treated 440 stainless steel with ground finish. Slide bases are made of dense aluminum with a black anodized finish. (Includes LP4-MBA magnetic base). Order optional 78 Series mount for customized mounting needs.		2	795.00	10/27/23	1,590.00T
LP-440R	The LP-440R Micropositioner is intended for probing applications in the testing and analysis of silicon wafers, substrates, and dies in the semiconductor industry. It provides 3-axis motion with .300" movement on each axis. Motion is controlled by three inline adjustment screws with 40 threads per inch. Precision high-quality 440 stainless steel ball bearings allow precise linear motion on all three axis. Gibs and Slides are made of heat treated 440 stainless steel with ground finish. Slide bases are made of dense aluminum with a black anodized finish. (Includes LP4-MBA magnetic base). Order optional 78 Series mount for customized mounting needs.		2	795.00	10/27/23	1,590.00T
78-LP5-MMK1/2	Mounting Bracket for LP-600 Micropositioner. Provides probeholder mounting block with insulated 2" extension. Designed for probeholders with .125" mounting shank.		4	145.00	10/27/23	580.00T
74B-1 x 2.0/45	DC Probeholder made from 0.125" OD gold plated brass. Length: 2.0" / Probe mounting hole angle: 45 degrees		4	95.00	10/27/23	380.00T
72T-J3/06x1.25"	20 mil tungsten probe, straight. Overall length: 1.25", Taper: .200" - .220", Radius: 0.6 µm (10 pcs per box)		50	7.60	10/27/23	380.00T
