CompoSeal Mobilea II

New technology for portable and safe sealing

Mobilea II meets the high demands of professional sealing and combines it with the benefits of modern battery technology. The Lithium Polymer battery realises a high sealing performance and offers a portable light weight solution. Mobilea II is therefore designed for mobile sealing in donation teams or at processing departments. Furthermore the intelligent power management combines high quality seals with short sealing times.

CompoSeal Mobilea II - the portable light weight sealer with a high battery capacity

- Modern Lithium Polymer battery provides a capacity of up to 1000 seals per full charge on standard blood bag tubes
- Designed for portable use: Low weight power pack of just 760g, robust metal housing, rubber pads for shock absorption
- High quality seals independent of the battery capacity
- Automatic adjustment of sealing time depending on tube thickness
- Approved for bedside sealing while donor is connected

CompoSeal Mobilea II Transport Case
