Dear ADDRESSING,
the order below will be paid for by a european grant that requires the purchase of services and goods from suppliers whose owners are not politically exposed persons. At the same time, the suppliers should not be targeted by EU international sanctions as a result of Russian activities in Ukraine. In order to complete your order, we ask you to confirm the text below.

"I declare that our company or any subcontractor(s) is not a company in which a public official referred to in Section 2(1)(c) of Act No. 159/2006, on Conflict of Interest, or a person controlled by him/her, owns a share representing at least 25% of the shareholder's participation in the company. Furthermore, I declare that the offered performance is not subject to EU sanctions and that the selected contractor and its subcontractor(s), if any, are not a person, entity or body on the EU sanctions list or a person, entity or body prohibited from awarding or further performing the public contract (Art. 5k of Council Regulation (EU) No 2022/576 of 8 April 2022 amending Regulation (EU) No 833/2014 concerning restrictive measures in view of Russia's activities destabilising the situation in Ukraine)."

Thank you for your understanding.

Yours sincerely,

Amount	Unit	Item name	Price without VAT	VAT (%)	VAT amount	Total price
1,00	kpl	publikační polatek za článek: ?Synthetically-primed adaptation of Pseudomonas putida to a non-native substrate D-xylose? v časopise Nature Communications.	5 690,00	0	0,00	5 690,00

Total price with VAT: **5 690,00 EUR**

Open Access Fees and Funding

All articles published in *Nature Communications* are made freely and permanently available online immediately upon publication, without subscription charges or registration barriers. Further information about open access can be found [here](#).

As authors of articles published in *Nature Communications*, you are the copyright holders of your article and grant to any third party, in advance and in perpetuity, the right to use, reproduce or disseminate your article.

Benefits of open access

Publishing OA offers a number of benefits, including greater reach and readership for your work:

Cited more

1.6x more citations of OA articles than non-OA articles across all subjects

Downloaded more

4x more downloads of OA articles than non-OA articles

Greater impact

2.5x more Altmetric attention. OA articles attracted 1.9x more news mentions and 1.2x more policy mentions

Find out more about [benefits of OA](#).

Article processing charges (APC)

Authors who publish in *Nature Communications* are required to pay an article processing charge (APC). The APC price will be determined from the date on which the article is accepted for publication.

The current APC, subject to VAT or local taxes where applicable, is: £5090.00/\$6790.00/€5690.00

Visit [our open access support portal](#) and [our Journal Pricing FAQs](#) for further information.

Open access funding

Visit Springer Nature's [open access funding & support services](#) for information about research funders and institutions that provide funding for APCs.

Springer Nature offers agreements that enable institutions to cover open access publishing costs. Learn more about our [open access agreements](#) to check your eligibility and discover whether this journal is included.

Springer Nature offers APC waivers and discounts for articles published in our fully open access journals whose corresponding authors are based in the world's lowest income countries (see [our APC waivers and discounts policy](#) for further information). Requests for APC waivers and discounts from other authors will be considered on a case-by-case basis, and may be granted in cases of financial need (see [our open access policies for journals](#) for more information). All applications for discretionary APC waivers and discounts should be made at the point of manuscript submission; requests made during the review process or after acceptance are unable to be considered.

Creative Commons licenses

OA articles in Springer Nature journals are published under Creative Commons licenses. These provide an industry-standard framework to support easy re-use of OA material. Under Creative Commons licenses, authors retain copyright of their articles.

Nature Communications articles are published OA under a [CC BY license](#) (Creative Commons Attribution 4.0 International license). The CC BY license is the most open license available, and is considered the industry 'gold standard' for open access; it is also preferred by many funders. This license allows readers to copy and redistribute the material in any medium or format, and to alter, transform, or build upon the material, including for commercial use, providing the original author is credited.

In instances where authors are not allowed to retain copyright to their own article (where the author is a US Government employee for example), authors should contact the [Open Research Support team](#) before submitting their article so we can advise as to whether their non-standard copyright request can be accommodated.

Authors are advised to check their funder's requirements before selecting OA, to ensure compliance. Learn more about [funder compliance](#).
