Tolerances see description of each item. Theoretical calculations are enclosed for all of the above coatings. If not specified there, all diagrams show transmission/reflection without consideration of the rear surface.

If not described otherwise, we use holders with rims (normally covering about 2% of the diameter, minimum 0,5mm), which will remain uncoated.

We deliver within about 22-24 weeks after an order has been placed.

If you should have further questions or wishes, please contact us. We would be glad of an order from you. This quotation is subject to our conditions of sale (available upon request).

Yours sincerely
