Quotation No. 20240528-1

May 28th, 2024

Quotation for the synthesis and purification of [H-3]VU6013720

[REDACTED],

Thank you for your inquiry concerning the synthesis of [H-3]VU6013720. We will perform a direct H/T exchange and expect a specific activity in the range of 15-40 Ci/mmol. Subsequently, labile tritium will be exchanged, and the compound will be purified by HPLC to an RCP > 97%. We will give our very best to obtain purity and specific activity as high as possible.

We would like to offer you the project under the following conditions:

[H-3]VU6013720

Direct H/T-exchange with 99% T₂ gas using our internal conditions

Removing of labile tritium

Analysis of the crude compound

HPLC purification to RCP > 97%

Analysis of the pure compound

Specifications: SA 15-40 Ci/mmol, *as high as possible*; RCP > 97% (HPLC), *as high as possible*; solution of 1 mCi/ml in EtOH

Prices:

1 mCi	CHF	6600.00
- 10% university discount	CHF	660.00
Total price for 1 mCi	CHF	5940.00

Please provide us with approx. 20 mg of the compound VU6013720 as starting material and reference. Freight charges to your debit.

General terms

Delivery time

1-3 weeks from the arrival of the compounds and your order

Shipment

Shipment on dry ice with FedEx, tentatively CHF 500.- (incl. dry ice).

Licenses

This is a radioactive product; the consignee must have a license to receive radioactive materials (import and handling license). Please send us a copy of your valid license with your first order to guarantee a rapid turnaround

Payment

30 days net. (Exclusive VAT and Taxes)

This quotation is valid for 90 days. *We refuse any liability in case of an unexpected failure of the reaction and no cost arise for the labelling work if no labelled compound can be delivered.*

Please always mention the quotation number in any correspondence concerning this quotation.

We look forward to carrying out the project for you. Please contact us if you have any further remarks or questions.
