The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the importance of the public sector in the provision of health care services. The public sector is seen as a key provider of health care services, and it is expected that it will continue to play a major role in the future. This is reflected in the fact that the public sector is the largest employer in the health care sector, and it is expected that this position will be maintained in the future.

The public sector is also seen as a key provider of health care services, and it is expected that it will continue to play a major role in the future. This is reflected in the fact that the public sector is the largest employer in the health care sector, and it is expected that this position will be maintained in the future.
