

The diagram shows a 10-story building with a blue horizontal line at the 5th floor. The building is divided into three vertical sections. The left section has 4 floors above the line and 1 floor below. The middle section has 4 floors above the line and 4 floors below. The right section has 4 floors above the line and 1 floor below. The floors are numbered 1 to 10 from bottom to top. The diagram is used to illustrate the concept of a 'floor' in a building.
