## Kinetics NEO

Proven Excellence.

Pno	Item number Description	List Price	Pcs	%	Price
10	<b>SW-KIN-NEO.MSA</b> NETZSCH Kinetics Neo, Academic version (Download). Only for universities, research institutes and other non-profit institutions. Main License: "Node Locked" license, 2 serial numbers for activation on two computers are included. Software for the kinetic analysis of thermal measurements on chemical reactions. Thermokinetics software features both model-free and model-based methods. Methods allow for the analysis of single-step and multi-step processes as well as for the determination of a kinetic model and for the making of predictions based on a selected model or method. The software analyzes thermoanalytical measurement data from sources including TGA,DTA,DSC,DIL,DEA; it allows for an unlimited number of measurements per analysis. Kinetics NEO contains a model-free approach with seven methods including Friedman, Ozawa-Flynn-Wall (OFW) and Kissinger-Akahira-Sunose (KAS). The powerful numerical model-free method ensures fast determination of the best model-free solution. Kinetics NEO contains a unique model-based method, with fast visual construction of a kinetic model for reactions with any number of steps in any combination. Individual reaction steps can be easily added, removed, changed or optimized by the user. Each step may be one of 16 predefined reaction types. The software allows for the statistical comparison of results from all model-free and model-based methods. The software provides a prediction of the signal, conversion, formal concentration of reactants and reaction rate as a function of time and temperature for the given temperature conditions as defined by the user or optimized by the software. For technical details, see the "Kinetics Neo" data sheet, which is available separately. Service contract for 12 months is included. A cost-efficient prolongation is possible on request before the contract expires. This service includes: <ul style="list-style-type: none"> <li>• Kinetics usage support based on samples delivered with the software.</li> <li>• Kinetics Neo software updates and upgrades.</li> <li>• 15% discounts for Kinetics Neo training.</li> <li>• 2 x 1-hour telephone conference for customer support.</li> <li>• Access to the Kinetics documentation (web).</li> </ul> On request, additional licenses (SW-KIN-NEO.AL) are available at a reduced fee. For licensing details, see the Software License Agreement and the "New Licensing in Advanced Software" info document, which are available separately. <b>IMPORTANT:</b> if the software will be sold without an instrument - it is allowed to only sell it in the European Union. Outside the European Union, for this special case the CD version must be ordered. Upon receipt of an order, please note that it is absolutely mandatory to submit an e-mail address and a personal contact for dispatch of the software license by e-mail. Note: Kinetics Neo requires a state-of-the-art PC with an x64 Windows operating system (Windows 7 or higher, 64-bit only in each case).	Kč132,132.00	1		Kč132,132.00
