PŘÍKAZCE OPERACE PROHLAŠUJE, ŽE SE JEDNÁ O VÝDAJ, KTERÝ JE ROZPOČTOVÁN POD
POLOŽKOU V DÍLČÍM ROZPOČTU DANÉHO ÚSEKU.
(THE PRINCIPAL OF THE OPERATION DECLARES THAT THIS IS AN EXPENDITURE
BUDGETED UNDER IN THE SUB-BUDGET OF THE SECTION CONCERNED.)

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of care for the ageing population, which is based on the principles of 'active ageing' and 'positive ageing'. The 'new paradigm' is based on the idea that ageing is a process, and that people's health and social care needs change as they age. The 'new paradigm' is based on the idea that people's health and social care needs are determined by a range of factors, including their physical health, mental health, social circumstances, and the environment. The 'new paradigm' is based on the idea that people's health and social care needs are not fixed, and that they can be changed through a range of interventions.
