Collaboration on retinitis pigmentosa pig model

[REDACTED]

thank you very much for your support and willingness to collaborate on the characterization of our PLN-R14del mutant pig model. According to our previous discussions, we formally place the maintenance of 5 breeding animals, the production of 3 litters of experimental animals and the collaborative conduction of AAV-based therapy experiments at the PigMod Center in Libechov. We agree to the proposed advanced payment for our scientific collaboration of 119,000 CZK / 5,000 EUR. The invoice should be addressed to:
