

Dell Pro Max 16 Plus

Maximize application performance with
Dell Pro Max Plus.

Experience desktop-like performance with latest 55W Intel® Core™ Ultra processors
and next gen NVIDIA RTX PRO™ Blackwell professional graphics.

Designed for your most intensive workloads, including AI Development, in a mobile form factor.

Extraordinary performance

The 16-inch laptop delivers unparalleled scalability and performance, making it perfect for demanding professionals and enthusiasts. Powered by 55W Intel Core Ultra processors with integrated graphics and NPU. NVIDIA RTX PRO™ 5000 Blackwell Generation graphics (24GB), up to 256GB CAMM (up to 7200MT/s) DDR memory (or 96GB SODIMM) and 12TB of storage (RAID support); this machine can handle the heaviest workloads with ease. Thunderbolt 5 support ensures blazing-fast data transfers, while the industry-leading thermal system, complete with three fans, stacked GPU and CPU architecture, and maximum thermal venting, keeps the device cool under pressure.

Elevated experience

An expansive UHD (up to 4K) Tandem OLED 16", 120Hz refresh rate, 16x10 narrow bezel display with VESA HDR-1000 TrueBlack provides for stunningly vivid visuals and deep contrasts. The full-size, reduced lattice keyboard, complete with a number pad and a large clickpad, ensures effortless interaction and navigation. Collaborate clearly with 8MP RGB + IR camera that also delivers fast sign-ins and power-on functionality. Enjoy immersive, crystal-clear sound with Waves MaxxAudio Pro technology, enhanced by advanced noise reduction. Power through your day leveraging a 165W/280W USB Type-C adapter equipped with EPR support, allowing for single-cable docking convenience and charging. Plus, the easy-access bottom door option makes upgrades and maintenance a snap.

Exceptionally mobile

Equipped with advanced connectivity options like WiFi 7, Bluetooth 5.4, 2.5G LAN, and 5G LTE, this device ensures you're always connected wherever work or life takes you. Its robust 96Whr 6-cell battery with Express Charge 2.0 and Performance Discharge technology lets you power through demanding tasks throughout your day. Despite its powerhouse features, it remains remarkably portable, starting at just 5.6lbs (2.54kg), striking the great balance between extreme performance and mobility.

Expanded sustainability

Incorporates bio-based materials and recycled content. Employs 100% recycled packaging and shipping material. EPEAT Gold registered with Climate+ designation, Energy Star 9.0 and TCO10 certified products.

Excellent reliability

Tested and certified by leading ISVs to guarantee outstanding application performance, MIL-STD tested for durability against everyday wear and tear, and backed by a reliable warranty with optional service enhancements.
