The first of these is the fact that the system is not a simple one. It is a complex system, and as such, it is not possible to understand it by looking at its parts in isolation. The system is a whole, and it is only by looking at the whole that we can understand it. This is the first principle of systems thinking: the whole is greater than the sum of its parts.

The second principle is that the system is dynamic. It is not a static system, but a system that changes over time. The system is a process, and it is only by looking at the process that we can understand it. This is the second principle of systems thinking: the system is a process.

The third principle is that the system is interconnected. The system is not a collection of separate parts, but a collection of parts that are interconnected. The system is a network, and it is only by looking at the network that we can understand it. This is the third principle of systems thinking: the system is a network.

The fourth principle is that the system is self-organizing. The system is not a system that is imposed from the outside, but a system that organizes itself from the inside. The system is a self-organizing system, and it is only by looking at the self-organizing process that we can understand it. This is the fourth principle of systems thinking: the system is a self-organizing system.

The fifth principle is that the system is resilient. The system is not a system that is fragile, but a system that is resilient. The system is a resilient system, and it is only by looking at the resilient process that we can understand it. This is the fifth principle of systems thinking: the system is a resilient system.

The sixth principle is that the system is sustainable. The system is not a system that is unsustainable, but a system that is sustainable. The system is a sustainable system, and it is only by looking at the sustainable process that we can understand it. This is the sixth principle of systems thinking: the system is a sustainable system.

The seventh principle is that the system is equitable. The system is not a system that is inequitable, but a system that is equitable. The system is an equitable system, and it is only by looking at the equitable process that we can understand it. This is the seventh principle of systems thinking: the system is an equitable system.

The eighth principle is that the system is just. The system is not a system that is unjust, but a system that is just. The system is a just system, and it is only by looking at the just process that we can understand it. This is the eighth principle of systems thinking: the system is a just system.

The ninth principle is that the system is peaceful. The system is not a system that is not peaceful, but a system that is peaceful. The system is a peaceful system, and it is only by looking at the peaceful process that we can understand it. This is the ninth principle of systems thinking: the system is a peaceful system.

The tenth principle is that the system is harmonious. The system is not a system that is not harmonious, but a system that is harmonious. The system is a harmonious system, and it is only by looking at the harmonious process that we can understand it. This is the tenth principle of systems thinking: the system is a harmonious system.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.
