Agilent 990 Micro GC

Introduction

The Agilent 990 Micro GC system is the next generation of Agilent Micro GCs, incorporating state-of-the-art technology also used in industry-leading bench GCs. The 990 takes flexibility, usability, and servicability to a next level.

The 990 makes a difference compared to its predecessors as well as its competition by:

Unmatched speed of analysis. Clever selection of short, narrow bore, and high-speed columns in combination with a backflush option provides the fastest cycle times in the market.

Enhanced flexibility. The 990 takes modularity to a next level. Changing GC channels has never been easier. You are up and running in less than 10 minutes. With 14 column chemistries to choose from, there is always a perfect match to any application.

Sensitivity in gas analysis. Whether you are interested in gas composition, odorants, air quality, mine safety, or mud logging, the 990 is your number one choice, providing lab-quality results with unmatched repeatability and sensitivity down to 0.5 ppm.

Sample handling accessories. A wide variety of sample handling accessories meets the needs of your in-lab or field analysis, including:

- A full range of Stream Selector Valves for easy switching between samples and calibration or verification gas
- Genie filters to ensure that no droplets nor particles enter the injector
- A touchscreen for quick status updates
- Optional sample pressure-reducing equipment
