P.4 COMPUTER CODES

Computer codes and analytical methods that will be used for the Implementation Program and fuel licensing are listed below. These codes are assumed to be sufficiently verified and validated in the country of origin. The codes shall be verified and validated during the licensing process in the Czech Republic. The below codes and methods are listed. The documentation, described in Appendix E shall be submitted to the Owner under the Implementation Program and the licensing process in Czech Republic. Codes and methods descriptions shall also be included in the respective reports. The code description and qualification deliverables are listed in Appendix E, table E.2.

-----------------	--	--------------

Q - NUCLEAR FUEL PROJECT ORGANIZATION

Q.1 PROJECT MANAGEMENT AND ORGANIZATION

KHNP has established a standardized project implementation organization with Subcontractors with abundant experience and in-depth expertise to undertake numerous domestic and overseas nuclear power plants projects. Since the standardized project organization is the most efficient method of project management and one of the key factors for the successful completion of domestic and overseas projects, KHNP will apply the standardized project organization to the Project. This optimized project organization ensure that the Project will be completed on-time, within-budget based on excellent construction technology, expertise, and project management capabilities.

KHNP will manage EPC Contract and NFC as the Supplier for the entire project to meet the schedule and quality of all activities. The project organization of NFC, however, is not the same with EPC contract. The project organization and the individual responsibilities are prepared to meet the requirements of NFC work scope.

Q.1.1 PROJECT ORGANIZATION

KHNP will take the lead as NFC Supplier as well as EPC Contractor with the Owner while implementing the Project including Nuclear Fuel supply, commissioning tests and performing overall integrated Project management including Project organization. KHNP will make separate contracts with individual Subcontractors in areas such as design and engineering, Fuel Supply and maintenance.

The scope of work of Subcontractors are described in Appendix X.

KHNP ensure that high levels of integration and collaboration is achieved throughout the whole of the Subcontractor's organization and will be based upon our own internal methodologies and process.

Q.1.1.1 Overall Project Organization

KHNP will establish a Project organization with qualified, committed and dedicated staff in headquarter and the Site to achieve the Project goals. KHNP Project organization will consist of Czech Project Department in KHNP headquarter and Czech Nuclear Power Site in Czech Republic. All teams in headquarter and the Site will be fully dedicated to the Project. The Overall Project Organization is shown in Figure Q.1.1.

Figure Q.1.1 Overall Project Organization at Peak

Czech Project Department

To effectively manage the Project, Czech Project Department comprised of experienced personnel will be established in the head office of KHNP. The Czech Project Department will use a separate office space in the head office with appropriate security measures taken.

Project Team Development

The NFC Project Organization for NFC shares the EPC Contract Project Organization. KHNP will establish headquarter, construction and commissioning teams based on previous experience. This teams for the Project will be adjusted as necessary according to the progress of the Project from LWA to final turnover to the Owner. After EPC Contract is completed, KHNP will maintain optimized Project Organization to perform the NFC Work.

Q.1.1.2 Organization of Head Office

Figure Q.1.2 Head Office Organization

Q.1.1.3 Responsibility

Person in a key position will have decision right on roles and responsibilities described in below. In case of unavailability of person in a key position, a replacement of key position will take over the all role and responsibility from previous key person. KHNP will request an approval of replacement from the Owner in advance.

Q.2 PLANNING AND SCHEDULING

Generally, the description and structure of proposed planning and scheduling for NFC will be integrated in Project Time Management described in Project Management Plan document for EPC Contract. The Supplier will establish, describe, and maintain the project time management according to requirements stated related Project Management (PM) document of EPC Contract and the relevant scope in NFC.

[REDACTED]

[REDACTED]

[REDACTED]

The project time schedule for NFC is, however, shall be created, updated, and maintained by the supplier of the NFC according to the rules defined in the NFC.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

The structure of proposed planning and scheduling for governing NFC is provided in Table Q.2.1.

Table Q.2.1 Structure of proposed planning and scheduling for governing NFC

Categories	Scope of Supply	
	First Core Supply Batch	Reload Core Supply Batch
General Schedules	Appendix R Schedule of supplies and services to be delivered until provisional takeover	Appendix S Reload specific information exchange and associated schedules
Documents Schedules	Appendix E.2 General reports and documents	Appendix E.3 Cycle specific reports and documents
Payment Schedules	Appendix T.3.1 Payment for the First Core Supply Batch	Appendix T.3.2 Payment for Reload Supply Batch

Project Time Schedule

The Project time schedule is described for a time span of the Project duration. The Project time schedule will be organized, planned, managed, tracked and assessed in relation to the Work Breakdown Structure of the Project. The Project time schedule will be provided in appropriate levels.

Project Time Schedule Hierarchy

The Project will be divided into three parts from the time schedule responsibility point of view: EPC Contract time schedule, NFC time schedule and Owner's time schedule.

EPC Contract time schedule, containing the Works activities specified in the Scope of Supply Document of EPC Contract, will be created, updated, and maintained by KHNP according to the rules defined in the Project Management Document.

The NFC time schedule, containing the NFC activities covered by the Nuclear Fuel Contract, will be created, updated, and maintained by the supplier of the NFC according to the rules defined in the Nuclear Fuel Contract.

The Owner's time schedule, containing the activities under the responsibility of the Owner, will be created, updated, and maintained by the Owner according to the Owner's internal rules.

The overall Project coordination will be in KHNP's scope of supply. It means that the management and coordination of KHNP's Project time schedule, the NFC time schedule and the Owner's time schedule will be under KHNP's responsibility, as a single integrated process.

KHNP's Project time schedule, the NFC time schedule and the Owner's time schedule will be interconnected by means of the interdependency illustrated in Figure Q.2.1.

Figure Q.2.1 Project Coordination Responsibility

Project Time Schedule Submission and Updating

[REDACTED]

In the case of the coordination of any complicated activity the Owner requires a higher detail of the Project time schedule. The higher detailed time schedule will be submitted by KHNP and will be updated monthly and will form part of the Weekly Site Progress Report.

Deviations from and Modification of IOTS

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Q.3 NFC PROJECT CONTROL AND REPORTING

Generally, the description and structure of proposed control and reporting for NFC will be integrated in Project Integration Management described in Project Management Plan document for EPC Contract. The Supplier will establish, describe and maintain the project integration management according to requirements stated related Project Management (PM) document of EPC Contract and the relevant scope in NFC.

Q.3.1 DIRECT AND MANAGE PROJECT EXECUTION

The Project execution plan provides Project implementation and change processes that are used to ensure that the KHNP's scope of supply is completed on time and within budget. It describes the organizational framework and overall management system for the Project and defines roles and responsibilities of key personnel. It also describes Licensing and Permitting, procurement, manufacturing, transportation, construction and commissioning, and communication execution processes.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Risk Management Committee

[REDACTED] The risk management committee will review risk status report including Risk Register and related Risk Notices and make a decision on the proposed risk mitigating measures and suitability of risk possibility and impact. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Project Execution Plan

Project execution plan aims to meet the mutually expected high-level standards for health, safety, security, and the environment while achieving the Project goals.

The Execution Plan is provided for Licensing and Commissioning.

Licensing and Permitting

There are five kinds of license that should be acquired before proceeding each Project stage;

Q.3.2 MONITOR AND CONTROL OF PROJECT WORKS

Monitor and control of Project Works is the proactive process of tracking, reviewing, mitigating, and reporting the overall progress to meet the Project performance objectives and advising the Project management leadership on corrective actions on any underperforming areas of the Project. KHNP will develop the monitor and control process to effectively manage the Project and meet the safety and quality goals as well as the cost and schedule goals.

Track and Analysis of Project Risks

[REDACTED]

[REDACTED]

Development of Preventive Action Plan and Corrective Action Plan

KHNP will utilize risk management and constraint management process to keep the Project within the variance thresholds by preventing possibility of potential risks and constraints. KHNP will identify and evaluate risks and constraints and make corrective action plans.

Implementation of Preventive and Corrective Actions

KHNP will assign preventive and corrective actions to the right personnel and keep monitor the implementation status of preventive and corrective actions to bring the Project back within the variance thresholds.

[REDACTED]

[REDACTED]

Q.4 COMMUNICATIONS AND PROJECT DOCUMENTATION

Q.4.1 PROJECT COMMUNICATION MANAGEMENT

The purpose of Project communication management plan is to provide clear communication guideline to Project participants. KHNP will establish, implement and control communication management plan governing correspondence and written information flow between the entities during the whole Project period. KHNP will also operate centralized communications center where all official correspondences for the Project are to be handled.

In order to facilitate the flows of Project information exchange between organizations, it is permissible and desirable for the originator to address correspondence in accordance with their contractual responsibility, and also to designate the appropriate participant for action. Informal oral communication will be allowed, whenever necessary, to expedite progresses. However, final decisions and action items will be summarized in writing and distributed to the appropriate entities.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Project Communication Method

Information Sharing System

[REDACTED]

Project Meeting

KHNP will periodically at specified intervals hold meetings in order to exchange the Project information. KHNP will transparently disclose all the Project related information to the Owner and other entities so that best decisions are made.

Q.4.2 PROJECT DOCUMENT MANAGEMENT

Document Management System

[REDACTED]

[REDACTED]

[REDACTED]

KHNP will provide the project document management procedure to control the transfer of documentation including all documents submitted in the project document management adapted to all specific project requirements defined in EPC Contract and requirements mutually agreed between the KHNP and the Owner.

Project Document Management

Every piece of documents released by KHNP and Subcontractors to the Owner belongs to the common requirements of this chapter.

KHNP will comply with the rules and obligations specified in this chapter and will ensure that these rules and obligations are also fully applied to the Subcontractors.

All documents to be provided by Subcontractors will be reviewed and approved by KHNP before releasing to the Owner. KHNP will ensure that the Subcontractor's documents are in accordance with the applicable requirements and complete when released to the Owner.

Document Format

All document on paper and in electronic format will be submitted in accordance with below requirements.

Q.5 PENDING (CONSTRAINTS) ISSUES MANAGEMENT

The Project Constraint Management Plan will be implemented at the beginning of the Project and will be updated as the Project progresses.

KHNP will continuously monitor and manage the constraints in line with the progress of the Project. KHNP will repeat the process every time a new constraint is introduced into the Project and inform the Owner of any recognized potential and realizing constraints.

Constraint Management

The purpose of Project constraint management is to identify, mitigate or eliminate the Project-related constraints to successfully complete the Project within proposed budget and schedule. KHNP will systematically analyse and comprehensively manage the constraints to minimize impacts on the Project. KHNP will develop constraint register and prepare mitigation plan with previous experience.

The purpose of Project constraint management plan is to identify, mitigate or eliminate the Project related constraints to successfully complete the Project within proposed budget and schedule. The various constraints are usually interconnected, meaning that a change to one constraint will impact the other constraints. So, KHNP will systematically analyse and comprehensively manage the constraints to minimize impacts. The constraints management plan describes processes for the constraints management within the KHNP's Scope of Supply and related to the interfaces of its Scope of Supply.

R.1 SCHEDULE REQUIREMENTS

R.1.1 IMPLEMENTATION PROGRAM

In accordance with Chapter 2 of the NFC, the Supplier shall develop and implement the Implementation Program as described in Article 2.2.1 of the NFC and in Appendix P.

The Implementation Program shall be divided into two phases:

1. Phase leading to application for license(s) for construction of nuclear facility issued in accordance with Section 9(1) of the Czech Atomic Act; and
2. Phase leading to application for license(s) for operation of nuclear facility issued in accordance with Section 9(1) of the Czech Atomic Act.

R.1.2 NFC SERVICES

The schedules for provision of documents related to the NFC Services are listed in Appendix E.

The Supplier shall provide the below NFC Services prior to Provisional Takeover of each Unit in accordance with the following schedule and no later than on the dates determined in accordance with the column “Schedule” of the below table).

Fuel repair service (if applicable) and PIIP service shall be provided by the Supplier as set forth in Articles 2.2.3.2 and 2.2.3.3 of the NFC.

For the avoidance of doubt, repairs under Chapter 5 and repairs under Chapter 10 of the NFC shall be performed by the Supplier within time limits specified in Chapter 5 or Chapter 10 (as applicable) of the NFC.

Technical Assistance and Supervision according to Article 2.2.3.4 of the NFC shall be provided by the Supplier as set forth in Article 2.2.3.4 of the NFC.

R.1.3 PROVISION OF MEANS OF FUEL MANAGEMENT

The expected scope and deliveries related to the provision of Means of Fuel Management including training are described in Article 2.2.4 of the NFC and Appendices H and J.

Computer Codes, Documentation (as defined in Appendix I), Owner's personnel training and other Means of Fuel Management shall be delivered (including also installation of Computer Codes) in accordance with the schedule in the table below.

START	FINISH	Means of Fuel Management

R.3 SELECTED EPC CONTRACT MILESTONES

The below milestones of the EPC Contract are listed for information only in connection with this Appendix R. In case of any discrepancy between the below specification of EPC Contract milestones and specification of such milestones in the EPC Contract, the specification in the EPC Contract shall prevail.

S - RELOAD SPECIFIC INFORMATION EXCHANGE AND ASSOCIATED SCHEDULES

S.1 NUCLEAR MATERIAL DELIVERY AND RELOAD SUPPLY BATCHES SCHEDULES AND RELOAD DESIGN INTERACTIONS

S.2 SCHEDULED DELIVERY DATES FOR ALL RELOAD SUPPLY BATCHES

The Parties plan to order, manufacture and deliver Reload Supply Batches taking into account the Owner's intention to create a stockpile of fresh Fuel at the Plant Site.

The Owner shall notify the Supplier of the preliminary SDD based on Appendix C and/or results of Implementation Program.

S.3 CORE DESIGN SERVICE RELATED INTERACTIONS

S.4 SELECTED RELOAD ACTIVITIES

S.5 REPAIRS AND PIIP

Fuel repair service (if applicable) and PIIP service shall be provided by the Supplier as set forth in Articles 2.2.3.2 and 2.2.3.3 of the NFC.

For the avoidance of doubt, repairs under Chapter 5 and repairs under Chapter 10 of the NFC shall be performed by the Supplier within time limits specified in Chapter 5 or Chapter 10 (as applicable) of the NFC.

S.6 MANUFACTURING

T - PAYMENT SCHEDULES

Following completion of delivery under the NFC or fulfilment of other relevant milestone and subject to Acceptance by the Owner as specified in the NFC, if applicable, the Supplier has the right to issue an invoice for the NFC Deliverable as specified in this Appendix T.

T.1 GENERAL PRINCIPLE

If time schedules of the NFC specified in Appendix R, Appendix S or other part of the NFC are to be revised by an amendment of the NFC, the Parties shall assess whether associated payment schedules specified here below need to be revised accordingly. Payments already provided shall not be affected.

T.2 PAYMENT FOR IMPLEMENTATION PROGRAM

The price for the Implementation Program specified in Section 8.1 of the NFC shall be made in accordance with the following schedule, i.e., the invoices for the respective percentages of the price shall be issued by the Supplier upon fulfilment of the respective below milestones:

T.3 PAYMENT FOR FUEL ASSEMBLIES AND CORE COMPONENTS

V - PAYMENT INFORMATION AND INVOICE REQUIREMENTS

V.1 PAYMENT INFORMATION

Payments by Owner to Supplier under the NFC shall be made to the following bank account:

Item	
Name of the bank:	
Bank address:	
- street, number	
- post code	
- city	
- country	
SWIFT:	
EUR current account	
Bank Account	
IBAN FORMAT (if applicable):	

Payments by Supplier to Owner under the NFC shall be made to the following bank accounts:

Item	
Name of the bank:	
Bank address:	
- street, number	
- post code	
- city	
- country	
SWIFT:	
Bank Account	
IBAN FORMAT (if applicable):	

Or

Item	
Name of the bank:	
Bank address:	
- street, number	
- post code	
- city	
- country	
SWIFT:	
Bank Account	
IBAN FORMAT (if applicable):	

If either Party changes its banking information it shall be provided by Contract Amendment executed pursuant to Section 28.7. Such Contract Amendment shall be in force not later than 30 days before the nearest due date for payment under the NFC.

V.2 INVOICE REQUIREMENTS

The invoice issued by Supplier shall contain all elements specified by the EU VAT Directive, as further amended.

Such elements include:

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] be the date on which the invoice is delivered into the Owner's representative e-mail mailbox.

If the price is reduced after the supply takes place, the taxable amount shall be reduced accordingly. In such a case, Supplier is obliged to issue and deliver to the Owner a credit note. The credit note shall comprise the following elements:

[REDACTED]

Abstract

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the situation.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals and identifying any areas for improvement.

6. Throughout the process, communication and collaboration are essential. Team members should be kept informed of progress and any changes to the plan, and their input should be valued.

7. It is also important to document the process and results of the project. This provides a record of what was done, how it was done, and the outcomes achieved, which can be used for future reference.

8. Finally, it is important to reflect on the project and learn from the experience. This involves identifying what worked well, what challenges were faced, and how the project could be improved in the future.

1. The first step in the process is to identify the problem or goal. This involves understanding the current situation and what needs to be achieved.

2. Once the problem is identified, the next step is to gather information. This can be done through research, interviews, or data analysis.

3. After gathering information, the next step is to analyze the data. This involves looking for patterns, trends, and insights that can help inform the decision-making process.

4. The next step is to develop a plan or strategy. This involves determining the best course of action to achieve the goal, taking into account the available resources and potential risks.

5. Once a plan is developed, the next step is to implement it. This involves putting the plan into action and monitoring progress along the way.

6. Finally, the last step is to evaluate the results. This involves assessing the outcomes of the process and determining whether the goal was achieved.
