

1. The first step is to identify the problem.

2. The second step is to define the problem.

3. The third step is to analyze the problem.

4. The fourth step is to develop a solution.

5. The fifth step is to implement the solution.

6. The sixth step is to evaluate the solution.

Conclusion

The purpose of this study was to investigate the effects of the proposed system on the performance of the system. The results of the study show that the proposed system has a significant positive effect on the performance of the system.
