**Přílohy:** EUQN-253211\_1.pdf; MGEU\_EUQN-253211\_OrderSheet.xlsx

[REDACTED],

Nice to hear from you. We accept the order 2266500013/ 005 and we are ready to execute it.

Please find attached the new quote (with added purchase order number). I remember that you asked for 8Gbp per sample. From our stats, if you want to reach x100 mappable coverage, we usually generate 10Gbp per sample. I changed the throughput to 10Gbp per sample (without changing the price), however if this is not what you want, we can return to originally quoted 8Gbp. So to speak, these are the next steps:

## 1. Price Estimate

- Kindly review the details and scope of work outlined in the quotation.
- If all information is correct and you have no further questions, please print and sign the quotation.
- Please send a scanned copy of the signed quotation to my email address.
- The original signed hard copy should be sent together with your samples.

---

## 2. Order Sheet

The order sheet is straightforward, but please refer to the following detailed instructions for completion:

### Section I: Administrative and Platform Information

- Review all information in the yellow-highlighted fields.
- Complete all green-highlighted fields, including:
  - **Dispatch address:** Provide the address and contact details of the person responsible for shipping. This information is required to generate transport documents.
  - **Delivery address for data carrier:** If data will be delivered on a physical carrier, please provide the delivery address.

- **Data delivery information:** If data will be delivered electronically, please provide your cloud data or a Google domain email address for transfer from our Google Cloud.

## Section II: Sample Information

- Complete all green-highlighted fields that are not yet filled:
  - **Tube\_id:** The label on the tube.
  - **Sample\_id:** The name of your sample.
    - Please ensure that both Tube\_id and Sample\_id are unique, do not exceed 15 characters, and do not contain special characters (including spaces). Only “-” and “\_” are permitted.
  - Enter the measured quantities and volumes.
  - Provide information regarding the origin of the sample (e.g., tissue, whole blood, etc.).
  - Complete the dispatch address fields in columns N, O, and P.
  - Lastly, specify the buffer used to suspend your material.

Once completed, please return the order sheet in Excel format.

---

## Summary of Required Documents

To proceed, please provide:

- The signed quotation (scanned copy by email, original with samples)
- The completed order sheet in Excel format

Upon initial review of the documents, I will provide you with further shipment instructions and the necessary transportation documents.

If you have any questions or require further clarification, please do not hesitate to contact me.

I look forward to your response.

Best regards,

[REDACTED]
