

## Příloha č. 1 kupní smlouvy

### Technická specifikace předmětu plnění

<b>Minimální kupujícím (zadavatelem) požadované technické parametry - popis předmětu plnění</b>	<b>Popis předmětu plnění dodávaného prodávajícím (dodavatelem)</b> Dodavatel jako prodávající doplní ve všech řádcích informaci o tom, jestli splňuje požadované plnění (např. slovem „splňuji“ nebo „ano“), a tam, kde jsou požadovány parametry, uvede bližší popis, konkrétní údaje či hodnotu parametru či odkaz na stránku nabídky, kde jsou parametr či funkce uvedeny.
<b>Chladicí stroj č. 1 (náhrada za stávající chladicí stroj RHOSS TCAE 21T):</b>	<b>UNTES TCAEY 122 ASP1</b>
Počet ks:	1
<b>Technické parametry, funkce</b>	
<b>1. Minimální chladicí výkon: 22 kW</b>	22,7 kW
<b>2. Min. ESEER (Evropský sezónní energetický faktor UNI EN 14511/2013): 3,8</b>	3,82
<b>3. Doporučené rozměry (V x Š x H): 1290 x 1522 x 600 (mm)</b>	1290x1522x600
<b>4. Typ kompresoru: hermetický rotační spirálový</b>	ANO
<b>5. Min. objem akumulační nádrže: 40 l</b>	45 l
<b>6. Oběhové čerpadlo</b>	ANO
<b>7. Provoz při venkovních teplotách v rozmezí: -10 °C až 35 °C (při 50 % vlhkosti)</b>	ANO
<b>8. Teplotní spád média: 7/12 °C</b>	ANO
<b>9. Médium (nemrznoucí chladicí směs): 40 % glykolu</b>	ANO

<b>10. Maximální elektrický příkon (celkový): 9 kW</b>	8,7 kW
--	--------

**Umístění chladicího stroje č. 1, přibližný objem vyměňované nemrznoucí chladicí směsi v systému chlazení:**

<b>Budova</b>	Studničkova 7, Praha 2
<b>Místo:</b>	Terasa na střeše v úrovni půdy
<b>Základ pod chladicím strojem (stávající) *:</b>	Dva U profily na výšku 55 x 120 (š x v) v délce 270 cm usazené rovnoběžně 570 cm od sebe (vnější rozměr)
<b>Doporučená transportní cesta **:</b>	Jeřábem přes budovu o výšce cca 25 m; v případě transportu budovou je min. světlost dveří 64 cm a rozměr průchodu mezi trámy ve střešní konstrukci ve tvaru rovnoramenného pravoúhlého trojúhelníku se svislým rozměrem 180 cm a vodorovným 180 cm
<b>Objem vyměňované nemrznoucí chladicí směsi v systému chlazení ***:</b>	cca 140 l

<b>Chladicí stroj č. 2 (náhrada za stávající chladicí stroj RHOSS TCAEBY 130):</b>	UNTES TCAEY 115 ASP1
Počet ks:	1
<b>Technické parametry, funkce</b>	
<b>1. Minimální chladicí výkon: 14 kW</b>	14,9 kW
<b>2. Min. ESEER ((Evropský sezónní energetický faktor UNI EN 14511/2013): 3,4</b>	3,49
<b>3. Doporučené rozměry (V x Š x H): 1090 x 1522 x 580 (mm)</b>	1090x1522x580
<b>4. Typ kompresoru: hermetický rotační spirálový</b>	ANO
<b>5. Oběhové čerpadlo</b>	ANO

<b>6. Provoz při venkovní teplotě v rozmezí: -10 °C až 35 °C (při 50 % vlhkosti)</b>	ANO
<b>7. Teplotní spád média: 7/12 °C</b>	ANO
<b>8. Médium (nemrznoucí chladicí směs): 40 % glykolu</b>	ANO
<b>9. Maximální elektrický příkon (celkový): 6 kW</b>	5,9 kW

**Umístění chladicího stroje č. 2, přibližný objem vyměňované nemrznoucí chladicí směsi v rozvodu chlazení:**

<b>Budova:</b>	Studničkova 7, Praha 2
<b>Místo:</b>	Dvorní trakt
<b>Základ pod chladicím strojem (stávající) *:</b>	Betonový základ 100 cm x 320 cm (šířka x délka)
<b>Doporučená transportní cesta **:</b>	Příjezd do dvora z ulice Studničkova
<b>Objem vyměňované nemrznoucí chladicí směsi v systému chlazení ***:</b>	cca 560 l

<b>Chladicí stroj č. 3 (náhrada za stávající chladicí stroj RHOSS TCAE 470):</b>	UNTES TCAEBY 269 ASP1
<b>Počet ks:</b>	1
<b>Technické parametry, funkce</b>	
<b>1. Minimální chladicí výkon: 64 kW</b>	64,1 kW
<b>2. Min. ESEER (Evropský sezónní energetický faktor UNI EN 14511/2013): 4,5</b>	4,64
<b>3. Doporučené rozměry (V x Š x H): 1700 x 2650 x 1210 (mm)</b>	1700x2650x1210
<b>4. Typ kompresoru: hermetický rotační spirálový – 2 ks</b>	ANO
<b>5. Oběhové čerpadlo</b>	ANO + akumulační nádrž 230 l
<b>6. Provoz při venkovní teplotě v rozmezí: -10 °C až 35 °C (při 50 % vlhkosti)</b>	ANO

<b>7. Teplotní spád média 7/12 °C</b>	ANO
<b>8. Médium (nemrznoucí chladicí směs): 40 % glykolu</b>	ANO
<b>9. Maximální elektrický příkon (celkový): 25 kW</b>	24,4 kW

**Umístění chladicího stroje č. 3, přibližný objem vyměňované nemrznoucí chladicí směsi v rozvodu chlazení:**

<b>Budova</b>	Studničkova 2, Praha 2
<b>Místo:</b>	Rovná střecha budovy
<b>Základ pod chladicím strojem:</b>	Bude zajištěn objednatelem po stanovení hmotnosti a rozměrů nabídnutého chladicího stroje
<b>Doporučená transportní cesta **:</b>	Jeřábem, na střechu budovy ve výšce cca 23 m (ze dvora), z ulice cca 27 m
<b>Objem vyměňované nemrznoucí chladicí směsi v rozvodu chlazení ***:</b>	cca 650 l

\* Pokud dodavatel nevyužije pro ustavení strojů č. 1 a č. 2 stávající základ a dodá se strojem jinou konstrukci, pak je cena stroje včetně konstrukce základu, příp. včetně úpravy stávajícího základu.

\*\* Dodavatel může zvolit dle svého uvážení i jinou transportní cestu.

\*\*\* Pokud se skutečné množství doplňované nemrznoucí chladicí směsi bude o více než 10 % lišit od uvedeného objemu, je dodavatel oprávněn vystavit samostatný daňový doklad, ve kterém vyúčtuje kupujícímu (zadavateli) cenu za množství nemrznoucí chladicí směsi přesahující uvedenou hodnotu objemu zvýšenou o 10 % (účtována bude cena obvyklá na trhu).

V Praze	
dne 10.10.2017	Ing. Radek Hnilica – jednatel společnosti Air Tech Servis s.r.o.

## CHILLER SELECTION

Date

07.06.2017

### SELECTION

<b>Family</b>	Compact-Y SM
	TCAEY 115-130
<b>Model</b>	TCAEY 122 ASP1
<b>Webcode</b>	CY001

The images are for reference purposes only and may not represent exactly the models or the equipment subject of this document.

### CONSTRUCTION FEATURES

Packaged air-cooled water chiller with axial fans. Range with hermetic Scroll compressors and R410A refrigerant gas.  
ASP1 - Installation with pump and storage tank. (45 l)

**POWER SUPPLY:** 400V/3PH+N/50HZ

**TYPE OF COIL:** BRA-COPPER/ALLUMINUM COIL

**COIL PROTECTION:** RPB-COIL PROTECTION GRILLES

**TYPE OF PACKAGE:** PROTECTIVE PACKAGING

- Load-bearing structure and panels in galvanised and painted sheet steel (RAL 9018); base in galvanised sheet steel.
- Hermetic, Scroll-type rotary compressors, complete with internal thermal protection.
- Water side, braze welded plate heat exchanger in stainless steel, complete with antifreeze electric heater and suitably insulated.
- Air side heat exchanger comprised of a coil of copper pipes and aluminium fins.
- Double electric axial fan with external rotor, equipped with internal thermal protection and complete with protection grille.
- Male threaded water connections.
- Differential pressure switch that protects the unit from any interruptions to the water flow.
- Refrigerant circuit made from annealed copper piping (EN 12735-1-2) complete with: drier filter, charge connections, safety pressure switch on the high pressure side, pressure switch on the low pressure side, thermostatic expansion valve and check valves.
- Unit with IP24 level of protection.
- Possibility to select two controls:
  - STANDARD, with Adaptive Function;
  - compatible with Adaptive Function Plus.
- The unit is complete with the R410A refrigerant charge.

#### ELECTRICAL PANEL

- Electrical board accessible by opening the front panel, conforming with current IEC standards, and which can be opened and closed with a suitable tool.

○ Complete with:

- electrical wiring arranged for power supply 400-3ph+N-50Hz;
- auxiliary power supply 230V-1ph-50Hz drawn from the main power supply;
- general isolator, complete with door interlocking isolator;
- automatic compressor protection switch;
- protection fuse for auxiliary circuit;
- compressor power contactor;
- anti-disturbance network filter;
- compressor protection phase sequence monitor;
- unit protection against lack of a power supply phase;
- transformer for electronic control;
- user interface terminal board;
- remote unit control.

○ Programmable electronic board with microprocessor, controlled by the keypad inserted in the machine.

○ This electronic board performs the following functions:

- Regulation and management of the inlet water temperature set points; of the safety timer delays; of the circulating pump; of the compressor and system pump hour-run meter; of the electronic anti-freeze protection which cuts in automatically when the machine is switched off; and of the functions which control the operation of the individual parts making up the machine;

## CHILLER SELECTION

- complete protection of the unit, automatic emergency shutdown and display of the alarms which have been activated;
- visual indication of the programmed set points via the display; of the in/out water temperature via the display; of the alarms via the display; and of cooling operating mode via led;
- self-diagnosis with continuous monitoring of the functioning of the unit;
- user interface menu;
- alarm code and description;
- Advanced functions:
  - set up for serial connection (KIS and KCH accessory);
  - check-up and monitoring of scheduled maintenance status;
  - testing of the units assisted by computer;
  - self-diagnosis with continuous monitoring of the functioning of the unit;
  - with Adaptive Function.

Option with compatible control

- Electrical board accessible by opening the front panel, conforming with current IEC standards, and which can be opened and closed with a suitable tool.
- Complete with:
  - electrical wiring arranged for power supply 400-3ph+N-50Hz;
  - auxiliary power supply 230V-1ph-50Hz drawn from the main power supply;
  - general isolator, complete with door interlocking isolator;
  - automatic compressor protection switch;
  - protection fuse for auxiliary circuit;
  - compressor power contactor;
  - remote unit control.
- Programmable electronic board with microprocessor, controlled by the keypad inserted in the machine.
  - This electronic board performs the following functions:
    - Regulation and management of the outlet water temperature set points; of the safety timer delays; of the circulating pump; of the compressor and system pump hour-run meter; of the electronic antifreeze protection which cuts in automatically when the machine is switched off; and of the functions which control the operation of the individual parts making up the machine;
    - complete protection of the unit, automatic emergency shutdown and display of the alarms which have been activated;
    - compressor protection phase sequence monitor;
    - unit protection against low or high phase power supply voltage;
    - visual indication of the programmed set points on the display; of the inlet/outlet water temperature via the display; of the alarms via the display; and of cooling operating mode via LED;
    - self-diagnosis with continuous monitoring of the functioning of the unit;
    - user interface menu;
    - alarm code and description;
    - alarm history management (menu protected by manufacturer password).
  - The following is memorised for each alarm:
    - date and time of intervention (if the KSC accessory is present);
    - alarm code and description;
    - inlet/outlet water temperatures when the alarm intervened;
    - alarm delay time from the switch-on of the connected device;
    - compressor status at moment of alarm;
  - Advanced functions:
    - configured for serial connection (KRS485, KFTT10, KRS232 and KUSB accessory);
    - possibility to have a digital input for remote management of the double set point);
    - possibility to have an analogue input for the scrolling set-point via a 4-20mA remote signal
    - configured for management of time bands and operation parameters with the possibility of daily/weekly operating programs (KSC accessory);
    - check-up and monitoring of scheduled maintenance status;
    - testing of the units assisted by computer;
    - self-diagnosis with continuous monitoring of the functioning of the unit.
  - Set-point regulation via the AdaptiveFunction Plus with two options:
    - fixed set-point (Precision options);
    - scrolling set-point (Economy option).

## SELECTION

<b>Family</b>	EasyPack
	TCAEBY 269-2112
<b>Model</b>	TCAEBY 269 ASP1
<b>Webcode</b>	EAS01

The images are for reference purposes only and may not represent exactly the models or the equipment subject of this document.

## CONSTRUCTION FEATURES

Packaged air-cooled water chillers and R410A ecological refrigerant. Series with hermetic Scroll compressors.

B - Standard version

ASP1 - Installation with pump and storage tank. (230 l)

**POWER SUPPLY:** 400V/3PH+N/50HZ

**TYPE OF COIL:** BRA-COPPER/ALUMINIUM COIL

**EXCHANGER:** PA-PLATE EXCHANGER

**PRESSURE VISUALISATION DISPLAY:** SPS -HIGH-LOW PRESSURE DISPLAY

- Load-bearing structure and panels in galvanised and RAL 9018 painted sheet metal; galvanised steel sheet metal base.
- The structure consists of two sections:
  - technical compartment that houses the compressors, electrical panel and main components of the cooling circuit;
  - aeraulic circuit to house the heat exchange coils and motor-driven fans
- Scroll rotary hermetic compressors complete with internal thermal protection and resistance in the crankcase that is automatically activated when the unit stops (as long as the unit is electrically powered).
- Duly insulated stainless steel brazed plate heat exchanger on the water circuit side (tube and shell heat exchanger - STE option).
- Heat exchanger on air circuit side comprised of copper tubes and aluminium fins.
- Axial electric fans with external rotor, equipped with internal thermal protection and complete with protection nets set up in single row or double row depending on the models.
- Victaulic-type hydraulic connections.
- Differential pressure switch to protect the unit from any interruptions in the water flow.
- Cooling circuit built with annealed copper tube (EN 12735-1-2) complete with: cartridge dryer filter, load connections, safety pressure switch on the high pressure side with manual reset, LP and HP pressure transducer, safety valve/s, valve upstream of the filter, liquid indicator, insulation of the inlet line, thermostatic expansion valve or electronic expansion valve (accessory), cycle inversion valve and liquid receiver, non-return valve, gas separator on intake to the compressors.
- Unit with protection rating IP24.
- Control with AdaptiveFunction Plus function.
- The unit is supplied filled with refrigerant fluid R410A.

## ELECTRICAL PANEL

- Electrical panel can be accessed by opening the front panel, in compliance with IEC Standards in force, fitted with opening and closing via specific tool.

○ Complete with:

- electrical cables prepared for 400-3ph-50Hz power supply voltage;
- auxiliary circuit power supply 230V-1ph-50Hz drawn from the main power supply;
- 12V-1ph-50Hz control power supply drawn from the main power supply;
- power supply isolator master switch, complete with safety door locking device;
- automatic circuit breaker protection for compressors and motordriven fans;
- auxiliary circuit protection fuse;
- compressor power contactor;
- machine remote controls: ON/OFF summer-winter switch;
- machine remote controls: compressor operation light and main lock light.

○ Programmable microprocessor electronic board handled by the keyboard inserted in the machine.

○ This electronic board performs the following functions:

- regulation and control of the unit outlet water temperature settings; of the safety timers; of the circulation pump; of the system compressor and

pump hour-run meter; dei cicli di sbrinamento; of the pressurised defrost cycles; electronic anti-freeze protection that is automatically activated when the unit is off; and of the functions that control the operations of the individual parts making up the unit;

- complete protection of the unit, possible shutdown and display of all the triggered alarms;
- compressor protection phase sequence monitor;
- unit protection against low or high phase power supply voltage;
- display of the programmed set points on the display; of the water in/out temperatures on the display; of the condensation and evaporation pressures; of the electrical voltage values in the three phases of the electrical circuit that powers the unit; of the alarms on the display; of the chiller;
- user interface menu;
- alarm code and description;
- alarms log management (menu protected by manufacturer password).

○ In particular, for every alarm, the following are memorised:

- date and time of intervention;

• in/out water temperature values as soon as the alarm was triggered;

- the evaporation and condensation pressure values at the time of the alarm;

• alarm delay time from the switch-on of the connected device;

- compressor status at the time of the alarm;

○ Advanced functions:

- Hi-Pressure Prevent function with forced cooling capacity partialisation for a high outdoor temperature (in summer mode);

• set up for serial connection (SS, FTT10, KBE, KBM, KUSB accessory);

- possibility of having a discrete input for double set-point remote management (DSP);

• possibility of having a discrete input for total recovery management (RC100), the desuperheater (DS) or for the production of domestic hot water by means of a 3-way diverter valve (VDEV). In this case, there is the possibility of using a temperature probe instead of the discrete input. (see specific section for more information);

- possibility of having an analogue input for the shifting set-point via a 4-20mA remote signal (CS);

• management of time bands and operating parameters with the possibility of daily/weekly operating programs;

• check-up and verification of the scheduled maintenance status;

• computer-assisted machine testing;

• self-diagnosis with continuous monitoring of the machine operating status.

• MASTER/SLAVE management logic integrated into the single units - See specific section for Explanation

○ Set-point regulation via the AdaptiveFunction Plus with two options:

- fixed set-point (Precision option);

- set-point slidinge (Economy options).

## CHILLER SELECTION

### TECHNICAL DATA - TCAEBY 269 ASP1

#### Design parameters

	Cooling
External air temperature	[°C] 35
External air humidity	[%] 50
Evaporator Inlet fluid temperature	[°C] 12
Evaporator Outlet fluid temperature	[°C] 7
Altitude	[m] 0
Main exchanger fluid	Ethylen glycole 40%
Fouling factor	[m <sup>2</sup> °C/kW] 0,035

#### Performances

*At design conditions:*

	Cooling
Capacity (gross)	[kW] 64,1
Absorbed power (gross)	[kW] 23,3
EER (gross)	2,75

Capacity (UNI EN 14511/2013) [kW] 64,9  
EER (UNI EN 14511/2013) 2,76

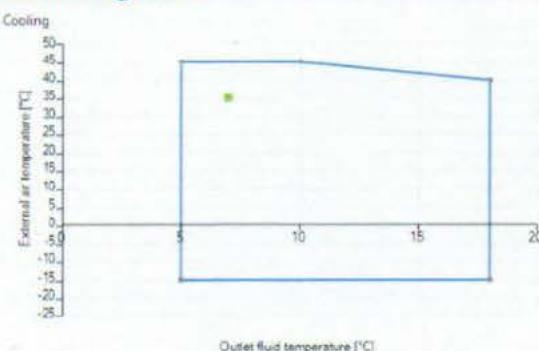

*At Eurovent conditions:*

ESEER (UNI EN 14511/2013)	4,11
EER 100% (UNI EN 14511/2013)	2,81
EER 75% (UNI EN 14511/2013)	3,66
EER 50% (UNI EN 14511/2013)	4,38
EER 25% (UNI EN 14511/2013)	4,45

*Adaptive Function Plus:*

ESEER+	4,64
--------	------

#### Functioning limits

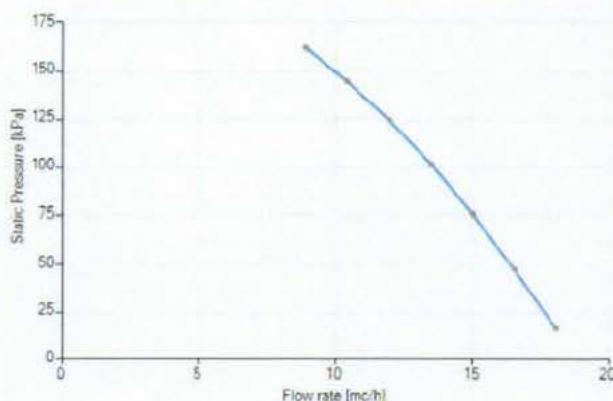

#### Main exchanger

Flow rate	[m <sup>3</sup> /h] 12
Static Pressure	[kPa] 124

## CHILLER SELECTION

### Static Pressure

### Fans

Type:	Axial
Fan number	2
Consumption for each	[kW] 0,69
Air flow rate	[m³/h] 20800

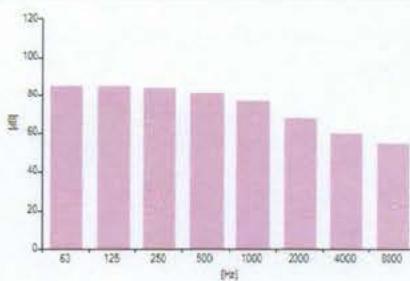

### Technical features

Refrigerant:	R410A
Compressors	Scroll
Number of compressors	2
Number of independent circuits	1
Number of compressor steps	3

### Noise

Sound Power level (1)	[dBA] 82
Sound Pressure level (10m) (2)	[dBA] 50
Sound Pressure level (1m) (2)	[dBA] 64
(Performance given without pump)	

[Hz]	[dB]
63	85
125	85
250	84
500	81
1000	77
2000	68
4000	60
8000	55

**CHILLER SELECTION**
**Electrical data**

Total electrical power (3)	[kW]	24,4
Pump electrical power	[kW]	1,1
Electrical power supply	[V-ph-Hz]	400-3+N-50
Auxiliary power supply	[V-ph-Hz]	230-1+N-50
Nominal current (4)	[A]	41,6
Maximum current	[A]	50,7
Starting current	[A]	199,7
Starting current SFS	[A]	129,3

**Size and weight**

Length	[mm]	2650
Height	[mm]	1700
