# Maintenance Agreement

between

**AutoSim AS**

and

**Transport R&D Centre**

## **Terms and Duration**

This agreement is valid from the day signed by the customer. The agreement is automatically renewed for one year at the time. Charges, terms and conditions in the renewed version are subject to modifications. Cancellation of the agreement must be given in written form by one of the parties within two months before automatic renewal. Appendix A shows the price at the time the agreement is signed.

There will be one main release of the software each year. Bugfix releases of the modules will be provided when necessary.

Telephone/email support will be given within the AutoSim normal working hours (08:00-16:00 Central European Time). Response will be given within 24 hours.

## **Contract options:**

### **Option A: SimWorld software support and update.**

- Covers software for one complete simulator setup.
- Updates and bug fixes of the software.
- Updates and new training scenarios.
- Telephone/email support regarding software and scenario building.
- Updates of the existing visual databases and new databases in the SimWorld series.
- Adaptation to country specific traffic signs and road marking.

### **Option B: Remote simulator hardware support.**

#### **Includes option A**

- Covers one complete simulator setup.
- Telephone/email support on AutoSim hardware for the complete simulator system.
- Includes drivers for the hardware.
- Assistance to obtain replacement for broken parts.

### **Option C: On site software and hardware support.**

#### **Includes option A and B**

- Covers one complete simulator setup.
- Covers work on hardware and software.
- Covers one visit each year including travel expenses for installation, configuration and test of new software release, and inspection on the complete hardware.
- If a problem cannot be repaired by telephone support, a service engineer from AutoSim will leave for the customer site to fix the problem after such decision has been made in a mutual understanding between AutoSim and the Customer. Travel and accommodation for such extra visit to be paid by the customer.
- Replaced parts are to be paid by the customer.

**Option D: Replacement of hardware**

**Includes option A, B, and C**

- Covers hardware replacement and repair cost for hardware which brakes during normal operation of the simulator
- Projector lamps are not included.
- Includes replacement of computers no longer suitable to run new versions of the software with satisfactory performance.
- One item of the following critical parts will be on storage at AutoSim:
  - Computer to replace any of the system computers.
  - USB/CAN converter.
  - Projector.
- Parts will be shipped within the next working day, normally by DHL. Shipping condition FOB Tromsø.

**This agreement is valid for Option C.**

**Annual price for option C is: € 16 000.**
