NAR-00609-R-2018 .R2

Intricate balance of hydrogen bonding, ion atmosphere and dynamics facilitates a seamless uracil to cytosine substitution in the U-turn of the neomycin-sensing riboswitch

Dear *****,

We are pleased to tell you that your manuscript has been accepted for publication in NAR and will now be processed by our Production office at OUP. You should receive a welcome email from the Production office within one week. If you have questions or concerns during the production process, you should contact the Production office directly (*****) and they will be pleased to assist you.

Please do take a moment to check that all names, affiliations, as well as acknowledgements and sources of funding are accurate. We will not be able to make corrections once the final typeset article has been published.

If your electronic figures are of production quality, you should receive page proofs of your article within 6 working days. The Journal's goal is to have a definitive, Medline-indexed version of your manuscript available online in approximately 10 working days. To meet this schedule, you must take the following actions:

- LICENCE TO PUBLISH. In order to publish your article, Oxford University Press requires that you complete a licence agreement online. A link to the online licensing system, and instructions on how to select and complete a licence, will be provided to you by the Production Editor at Oxford University Press in due course.
- OPEN ACCESS FORM. OUP provides free access to your article to readers worldwide and automatically deposits your paper in a public repository. Open access charges make this possible. For 2018 the all-inclusive publication charge is \$1385/£710/€1065 per article for NAR member institutions; \$2770/£1420/€2130 for non-members. You will be able to use our online system to pay your open access fee with a credit card, or request an invoice. Further instructions will be provided by the Production office in due course.
- Note that to claim your member institution discount, you will need to be connected to the Internet via an institutional Internet Protocol (IP) address, and you may need to empty your browser cache or delete browser cookies. There are discounts for authors in developing countries and for authors publishing two papers in NAR within a 12-month period, and there is a surcharge for over-length papers. Further information, including how an institution may purchase membership, are available at: https://academic.oup.com/nar/pages/Open_Access_Initiative
- PAGE PROOFS. Rapid publication requires that you return page proofs promptly upon receipt. Proofs will be sent to you as an email attachment. If you anticipate being away from the Internet during the period when proofs become available, please send an email in advance to Production (narese@oup.com) with contact details for someone who can correct proofs in your place.
- NIH PUBLISHING AGREEMENT. Applicable to NIH employees only. NAR complies with the NIH public access policy. As long as the NIH or one of its subsidiaries is listed in the funding section of

your article, it will be publicly available in PubMed Central no later than 12 months after issue publication without author involvement.

XXXXXXXXXXXXXXXXXXXXXXX

Dear *****,

Welcome to Oxford Journals! We have received your manuscript at *Nucleic Acids Research*. Our [Author Resource Centre](#) contains helpful information regarding the Production process.

Your Manuscript

Title: Intricate balance of hydrogen bonding, ion atmosphere and dynamics facilitates a seamless uracil to cytosine substitution in the U-turn of the neomycin-sensing riboswitch

Manuscript number: NAR-00609-R-2018 .R2

ID: gky490

The ID number shown above is part of the full DOI (digital object identifier) for your manuscript. Please quote this ID number in all correspondence relating to your paper. See [this website](#) for information on DOIs.

Next Steps

IMPORTANT: Signing your licence to publish

You *must* complete your licence before we can publish your paper. Please do this now by going to the Author Services site [here](#). You can also pay any fees associated with your paper via this system.

Once you have signed your licence to publish you can track the status of your manuscript online [here](#).

PLEASE NOTE: The account you need to use for online licensing is an OUP My Account. This is NOT the ScholarOne account you used during the submission process. If you do not have a My Account you can set one up during the process of assigning your licence by clicking on New User. This system also allows you to pay/request an invoice for any charges relating to your paper (e.g. for Open Access and excess pages), and to order offprints and copies of the issue in which your paper will appear. This system must be used to pay or request an invoice for the mandatory open access charge.

Proof Checking and Publication

Your paper should be published online within four weeks of receipt. You should receive the PDF proof of your article by email within the next 2 weeks, and you will be asked to return corrections within two working days. Authors are asked to correct their proofs online using TOP (Total Online Publishing) that allows authors to make corrections directly to their paper.

Please ensure that you, or a co-author on your behalf, will be available to receive the proofs at that time. If you foresee any difficulty in providing corrections please let me know as soon as possible.

Please ensure that you check author's names, affiliations, funding information and acknowledgments carefully during the proofing stage, as once the article appears online we will no longer be able to make any changes.

Once your paper has been published online, you will receive an email containing free-access links to the published article, which can be distributed to your colleagues.

NAR Twitter

Twitter is an effective way to broaden the reach of your research and connect with readers around the world. Follow and engage with***** to join the conversation and share your work. For more information on how to engage in the social media space as an author, visit [our Social Media page](#).

Important Information

Compliance with Funder policies on Open Access

For information on complying with funding agency policies on Open Access, including those of Research Councils UK, the Wellcome Trust, and the National Institutes of Health (NIH), please click [here](#).

Open Access prepayment account

Institutions and funders can deposit Open Access publication funds with Oxford University Press for use by qualifying authors. To find out if funds are available for your paper, please contact your librarian. More information on how to make use of a prepayment account is

available [here](#).

Contact

I am the Production Editor for your manuscript; please do not hesitate to contact if you have any questions or concerns. You will also receive communication from our typesetting team. They will send your proofs and incorporate your corrections.

I look forward to working with you, and thank you for publishing with Oxford Journals.

Best wishes,

Production Editor

Subject: RE: Claiming discount, manuscript ID: gky490

Dear *****

Thank you for your query. I will ask for your referee discount request to be processed as soon as possible. Once this process has been finished, the discounted charge will automatically show up when you log in to our payment page on the Author Services website. Please do not pay your charges or request an invoice before you have received confirmation that your discount has been applied.

In the meantime, do let me know if you have any other questions.

Kind regards,

***** | Production Editor

Subject: Claiming discount, manuscript ID: gky490

To Whom It *****,

I would like to claim a 10% discount towards the publication of an article in NAR which was awarded to Prof. Jiri Sponer (co-author of the ID: gky490 manuscript) for his reviewing activities last year (please see the e-mail below).

Per the instructions, I am contacting the production team directly.

Thank you very much in advance.

Best regards,

XXXXXXXXXXXXX

Article: Intricate balance of hydrogen bonding, ion atmosphere and dynamics facilitates a seamless uracil to cytosine substitution in the U-turn of the neomycin-sensing riboswitch

Acceptance date: 2018-05-23

Self-archiving information: The journal strongly encourages authors publishing their articles under an open access licence to deposit the version of record instead of the accepted manuscript when self-archiving. The version of record can be made available immediately on publication in accordance with the Creative Commons licence terms. Please refer to the journal's self-archiving policy or your licence agreement for terms and conditions.

Â

Dear Author

Thank you for using Oxford Journals Author Services to sign your licence to publish online. Attached is a copy of the licence for your records.

Remember you can view your signed licences online at any time by visiting your personal licence archive within your My Account.

The information at the start of this email has been provided in order to assist you with any deposit requirements you need to comply with (e.g. the HEFCE REF requirement).

Before we can publish your article Open Access, we require information from you in order to calculate the correct associated charge, determine whether you are eligible for any discounts, and arrange for invoicing. If you have not already selected your payment method on the online system, please do so now by returning to the Author Services pages using the link <https://secureacademic.oup.com/licensing/index.html?doi=10.1093/nar/gky490> clicking [Start >], then proceeding to checkout. Publication of your paper will not proceed until the payment process has been completed (either by paying online by credit/debit card, arranging payment of an invoice, or paying through the prepayment account).

Important: Authors based at a member institution are entitled to a discounted rate. In order for us to be able to recognise membership, you will need to view this page from a computer based at your institution, or connected to your institution's network.
